the book aims to make the study multidisciplinary and to include authors from different countries and different geographies. The scope and content of the study differs significantly from other books in terms of the issues it addresses and deals with. When we look at the main features of the study we can say the following: Handles the concept of security within the framework of technological development. Includes artificial intelligence and radicalization which has little place in the literature. Evaluates the phenomenon of cyber espionage. Provides an approach to future wars. Examines the course of wars within the framework of the Clausewitz trilogy. Explores ethical elements. Addresses legal approaches. In this context the book offers readers a hope as well as a warning about how technology can be used for the public good. Individuals working in government, law enforcement and technology companies can learn useful lessons from it.
