**Christians and the State** John C. Bennett, 2019-01-16 From the Introduction Political problems have come to be the most fateful social problems Three decades ago it seemed that economic problems were primary and Christian writers about society were generally preoccupied with them Even then economic problems led to questions concerning the role of the state in economic life which remains one of the most urgent of the political problems Today while there is not doubt about the significance of the interaction between economics and politics on many levels it seems that the greater threats to man come from the conflict of political ideologies from political instability within various countries and regions and from the danger of nuclear war There are issues of economic justice and well being involved in all of these threats but we can no longer assume that all political ideas and forces and decisions are merely reflections of what happens in economic life History of Socialism Harry W. The Moral Background Gabriel Abend,2016-05-31 In recent years many disciplines have become interested in the scientific study of morality However a conceptual framework for this work is still lacking In *The Moral Background* Gabriel Abend develops just such a framework and uses it to investigate the history of business ethics in the United States from the 1850s to the 1930s According to Abend morality consists of three levels moral and immoral behavior or the behavioral level moral understandings and norms or the normative level and the moral background which

includes what moral concepts exist in a society what moral methods can be used what reasons can be given and what objects can be morally evaluated at all This background underlies the behavioral and normative levels it supports facilitates and enables them Through this perspective Abend historically examines the work of numerous business ethicists and organizations such as Protestant ministers business associations and business schools and identifies two types of moral background Standards of Practice is characterized by its scientific worldview moral relativism and emphasis on individuals actions and decisions The Christian Merchant type is characterized by its Christian worldview moral objectivism and conception of a person s life as a unity The Moral Background offers both an original account of the history of business ethics and a novel framework for understanding and investigating morality in general     Adult Catalog: Subjects Los Angeles County Public Library,1970     Standard Catalog for Public Libraries H.W.
