Rise of Digital Empires: How to Stay Ahead in a Rapidly Changing World Silas Mary, 2025-02-20 The rise of artificial intelligence and automation is reshaping industries at an unprecedented pace AI Automation and the Rise of Digital Empires teaches you how to stay ahead in this rapidly changing world by harnessing the power of technology to build scalable future proof businesses This book explores how AI and automation can streamline operations improve decision making and create new revenue streams Learn how to integrate cutting edge technologies into your business adapt to the digital revolution and lead your industry in the age of automation With these insights you ll position your business as a digital empire ready to thrive in the future Obsolete to Optimal: How AI can transform aging U.S. enterprise systems in Insurance and Retail

2025 AUTHOR:1 - Pratyosh Desaraju, AUTHOR:2 - Dr Rohit Kumar Sachan, PREFACE In an era defined by rapid technological change and increasing customer expectations many of the enterprise systems that underpin the U S insurance and retail sectors find themselves at a crossroads Built decades ago to handle today s challenges these legacy platforms struggle under the weight of ever growing data volumes complex regulatory demands and the onslaught of digitally savvy consumers Yet within these very constraints lies extraordinary opportunity the chance to transform the obsolete into the optimal by harnessing the power of artificial intelligence Obsolete to Optimal was born from conversations with technology leaders data scientists and operations executives who shared a common refrain We know AI can help but where do we start and how do we avoid the pitfalls This book seeks to answer those questions by weaving together strategic insight practical guidance and real world examples Our goal is twofold first to demystify the process of embedding AI within aging infrastructures and second to show how this integration not only solves immediate operational challenges but also lays the

groundwork for sustainable future proof growth Throughout these pages you will find a progression that mirrors the journey every organization must undertake We begin by establishing why data modernization is not merely an IT upgrade but a business imperative From there we delve into the human element empowering employees to work alongside AI embracing new roles and cultivating a culture of continuous learning Sector specific chapters then illuminate how AI can revolutionize core functions from underwriting and claims processing in insurance to inventory management and personalized marketing in retail No transformation is without its challenges We confront head on the technical hurdles of integrating AI with brittle legacy systems the organizational resistance that accompanies any major change and the ethical considerations that arise when machines make decisions that affect real people By offering frameworks for governance bias mitigation and transparent decision making we aim to equip leaders not only to deploy AI effectively but to do so responsibly Finally as we look toward 2030 we paint a vision of industries that have shed their outdated pasts and embraced an AI powered future one characterized by agility resilience and customer centric innovation Whether you are a C suite executive charting a digital strategy a technology professional tasked with implementation or an academic seeking to understand the practical contours of AI adoption this book is your guide It is my hope that by the final chapter you will see legacy systems not as obstacles but as ripe opportunities platforms ready to be upgraded enhanced and reinvigorated by intelligent automation May Obsolete to Optimal inspire you to embark on that transformation journey and may you find the insights here both actionable and enduring Authors Pratyosh Desraj Dr Rohit Kumar Sachan *The Power of Agentic AI: Redefining Human Life and Decision-Making* C. Kishor Kumar Reddy, Shenson Joseph, Herat Joshi, Srinath Doss, Mariya Ouaisa, 2025-09-26 This book explores how autonomous AI systems are reshaping human decision making across various industries and society The book delves into the concept of Agentic AI AI systems that can act independently and make decisions without human intervention Unlike existing literature that speculates about superintelligent systems this book offers practical insights into how current AI systems are already transforming sectors like health care finance and law It highlights the growing impact of these technologies on professional roles and governance offering a balanced view of both the opportunities and challenges presented by AI autonomy The book's findings show that Agentic AI enhances decision making by improving efficiency accuracy and scalability However it also presents ethical concerns related to accountability transparency and the shifting nature of human responsibility in AI mediated environments It emphasizes the need for robust ethical frameworks and governance structures to ensure that AI systems align with human values By focusing on real world applications and current AI technologies the book provides actionable insights for decision makers helping businesses policymakers and technologists navigate the evolving AI landscape It offers a roadmap for understanding the present day capabilities of autonomous systems and prepares professionals for the ethical and operational challenges of integrating these technologies Readers will gain a comprehensive understanding of how Agentic AI is poised to redefine human life and decision making making it essential for

anyone interested in the future of technology ethics and innovation Unlike traditional AI which typically requires human supervision or input Agentic AI introduces the concept of autonomy AI systems that can act learn and make decisions independently This paradigm shift challenges the conventional human centered approach to decision making positioning AI as a true partner in complex cognitive tasks The book also explores the ethical and societal implications of AI autonomy in ways that extend beyond typical discussions Advances in Information Retrieval Claudia Hauff,Craig Macdonald,Dietmar Jannach,Gabriella Kazai,Franco Maria Nardini,Fabio Pinelli,Fabrizio Silvestri,Nicola Tonellotto,2025-04-03 The five volume set LNCS 15572 15573 15574 15575 and 15576 constitutes the refereed conference proceedings of the 47th European Conference on Information Retrieval ECIR 2025 held in Lucca Italy during April 6 10 2025 The 52 full papers 11 findings 42 short papers and 76 papers of other types presented in these proceedings were carefully reviewed and selected from 530 submissions The accepted papers cover the state of the art in information retrieval and recommender systems user aspects system and foundational aspects artificial intelligence and machine learning applications evaluation new social and technical challenges and other topics of direct or indirect relevance to search and recommendation **Artificial Intelligence: AI programs at U.S. universities** Richard K.
