**Handbook of Research on AI and Machine Learning Applications in Customer Support and Analytics** Hossain, Md Shamim, Ho, Ree Chan, Trajkovski, Goran, 2023-05-02 In the modern data-driven era, artificial intelligence (AI) and machine learning (ML) technologies that allow a computer to mimic intelligent human behavior are essential for organizations to achieve business excellence and assist organizations in extracting useful information from raw data. AI and ML have existed for decades, but in the age of big data, this sort of analysis is in higher demand than ever, especially for customer support and analytics. The Handbook of Research on AI and Machine Learning Applications in Customer Support and Analytics investigates the applications of AI and ML and how they can be implemented to enhance customer support and analytics at various levels of organizations. This book is ideal for marketing professionals, managers, business owners, researchers, practitioners, academicians, instructors, university libraries, and students and covers topics such as artificial intelligence, machine learning, supervised learning, deep learning, customer sentiment analysis, data mining, neural networks, and business analytics.

*Blockchain and Artificial Intelligence* Tom James, 2021-08-23 Blockchain and artificial intelligence are perhaps the two most significant disruptive technologies of this century, and both will significantly rewire the world of global financial markets and the world in which we live. While blockchain offers a number of significant advantages over traditional forms of finance, including lower cost and massive increases in operational efficiencies of traded markets, property records, and a whole host of transaction processes, artificial intelligence is moving fast from basic structured machine learning, doing menial yet important big data tasks like credit card fraud detection, to predictive analysis and real-time real-world risk management and investment decision making. There is still a lot of confusion in the market about cryptocurrencies, bitcoin, and the underlying blockchain technology. *Blockchain and Artificial Intelligence* highlights the

underlying technologies of blockchain and the differences between cryptocurrencies and blockchain financial applications It explores the current AI offerings and gives a vision of the fast moving developments in this area including the many solutions that are expected to revolutionize the way financial and commodity markets will operate in the future     **Agentic AI Blueprint** Zane H.
