*Handbook of Research on Teaching With Virtual Environments and AI* Panconesi, Gianni, Guida, Maria, 2021-02-19 The increasingly pervasive use of digital technology has catapulted society into an interconnected world where the natural boundaries between humankind and machine virtual and real individual and community have become less perceptible As individuals interact with different digital technologies they must build a digital intelligence which must be further cultivated as it is a key competency for the future of school and work Digital intelligence includes understanding the mutual strengths between people and technology as well as developing an awareness in the use of digital tools in order to avoid common threats such as cyberbullying addiction to video games techno stress and more As adolescents continue to engage with virtual reality and 3D virtual worlds where the online and offline overlap and coincide it is important to build this intelligence as well as utilize these technologies to promote successful learning The Handbook of Research on Teaching With Virtual Environments and AI explores the new personalized educational opportunities that are available with digital technology and virtual environments that can be used within education This book focuses on the use of these tools and how to navigate the use of new technologies such as AI and virtual environments for educational practices While highlighting topics such as virtual worlds game based learning intelligent tutoring augmented reality and more this book is ideal for teachers administrators technologists educational software developers IT specialists practitioners researchers academicians and students interested in how virtual environments and AI are being implemented in teaching practices

## **THEORY AND APPLICATIONS IN DEEP LEARNING** Dr. Shashi, Rashi Rastogi, Renato Racelis Maaliw III, Dr. Ashok Kumar, 2023-04-24

Deep learning is a subfield of computer science that is currently focusing the majority of its attention on the areas of video picture text and speech recognition in addition to autonomous driving robotics healthcare and other areas This is in addition to other areas such as robotics and healthcare Academics and academicians are currently showing a significant amount of interest in the field of deep learning This is because it is a subfield of study that focuses a significant emphasis on achieving outcomes which explains why this is the case Rina Dechter was the first person to use the phrase deep learning in 1986 and the building of an intelligent computer that could emulate the functioning of the human brain was the driving force behind the expansion of this field of study The term deep learning was coined by Rina Dechter who was also the first person to use the term The human brain which is in charge of decision making is the most important organ in the body In order for the brain to arrive at its conclusions it takes in data through its five senses sight smell touch and hearing Memory is another item that is stored in the brain and it is this memory that may be used to solve complicated problems by drawing on experiences that have been gained in the past Throughout the course of the past few decades scientists have kept alive the dream that they may one day be able to design a computer with intellect comparable to that of our own brains In order to make progress towards achieving this goal they have initiated research into the fundamental make up and operation of the human brain One

of the primary motivations behind the development of autonomous vehicles as well as robots that are capable of performing a variety of functions is the reduction in the number of collisions that take place along roadways This can be accomplished through the use of robots that are multi functional Because it is estimated by the World Health Organization WHO that 1 35 million people lose their lives on the roads of the world each year and since it is estimated that more than 90 percent of those deaths are the result of human errors that could have been avoided *Computerworld* ,1992-11-02 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network *Congressional Record* United States.
