Essential Ai Podcast Editor For Men:

AI Needs You Verity Harding, 2025-08-19 A humanist manifesto for the age of AI Artificial intelligence may be the most transformative technology of our time As AI s power grows so does the need to figure out what and who this technology is really for AI Needs You argues that it is critical for society to take the lead in answering this urgent question and ensuring that AI fulfills its promise Verity Harding draws inspiring lessons from the histories of three twentieth century tech revolutions the space race in vitro fertilization and the internet to empower each of us to join the conversation about AI and its possible futures Sharing her perspective as a leading insider in technology and politics she rejects the dominant narrative which often likens AI s advent to that of the atomic bomb History points the way to an achievable future in which democratically determined values guide AI to be peaceful in its intent to embrace limitations to serve purpose not profit and to be firmly rooted in societal trust Now with a new foreword by the author AI Needs You gives us hope that we the people can imbue AI with a deep intentionality that reflects our best values ideals and interests and that serves the public good AI will permeate our lives in unforeseeable ways but it is clear that the shape of AI s future and of our own cannot be left only to those building it It is up to us to guide this technology away from our worst fears and toward a future that we can trust and believe in

The Routledge Companion to Radio and Podcast Studies Mia Lindgren, Jason Loviglio, 2022-06-15 This comprehensive companion is a much needed reference source for the expanding field of radio audio and podcast study taking readers through a diverse range of essays examining the core questions and key debates surrounding radio practices technologies industries policies resources histories and relationships with audiences Drawing together original essays from well established and emerging scholars to conceptualize this multidisciplinary field this book s global perspective acknowledges radio s enduring affinity with the local historical relationship to the national and its unpredictably transnational reach In its capacious understanding of what constitutes radio this collection also recognizes the latent time and space shifting possibilities of radio broadcasting and of the myriad ways for audio to come to us live Chapters on terrestrial radio mingle with studies of podcasts and streaming audio emphasizing continuities and innovations in form and content delivery and reception production cultures and aesthetics reminding us that neither radio nor podcasting should be approached as static objects of analysis but rather as mutually constituting cultural forms This cutting edge and vibrant companion provides a rich resource for scholars and students of history art theory industry studies journalism media and communication cultural studies feminist analysis and postcolonial studies Chapter 42 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Person, Thing, Robot David J. Gunkel, 2023-09-05. Why robots defy our existing moral and legal categories and how to revolutionize the way we think about them. Robots are a curious sort of thing. On the one hand, they are technological artifacts and thus things. On the other hand, they seem to have social presence because they talk and interact with us and simulate the capabilities commonly associated with personhood. In *Person Thing Robot*, David J. Gunkel sets out to answer the vexing question: What exactly is a robot? Rather than try to fit robots into the existing categories by way of arguing for either their reification or personification, however, Gunkel argues for a revolutionary reformulation of the entire system, developing a new moral and legal ontology for the twenty-first century and beyond. In this book, Gunkel investigates how and why efforts to use existing categories to classify robots fail, argues that robot designates an irreducible anomaly in the existing ontology, and formulates an alternative that restructures the ontological order in both moral philosophy and law. *Person Thing Robot* not only addresses the issues that are relevant to students, teachers, and researchers working in the fields of moral philosophy, philosophy of technology, science and technology studies, STS, and AI, robot law, and policy, but it also speaks to controversies that are important to AI researchers, robotics engineers, and computer scientists concerned with the social consequences of their work.

Do Less Harm Courtney E. Thompson, Kylie M. Smith, 2025-08-05. Offers reflections, provocative questions, and practical strategies for ethical, responsible approaches to health history. In *Do Less Harm*, editors Courtney E. Thompson and Kylie M. Smith bring together a group of leading historians and scholars to confront one of the most pressing questions in health history: How can we ethically approach stories of medicine and health without perpetuating harm? This thought-provoking collection invites readers into a crucial conversation about the responsibilities of historians when documenting the past. Through carefully curated essays, the contributors explore the ethical dilemmas that arise in researching, teaching, and writing about the history of health care. From patient privacy to the politics of archives, the essays cover how health histories have often overlooked, misunderstood, or misrepresented the people and communities most affected by medical practices. The contributors challenge the assumptions of the field, offering a more thoughtful approach to historical research, one that emphasizes empathy, accountability, and inclusivity. The book raises provocative questions and proposes practical strategies for historians and scholars to do less harm in their work and is organized around key themes such as research, teaching, writing, and public engagement, making it an indispensable resource for anyone working in the history of health care, ethics, or the health humanities. With its engaging style and accessible insights, *Do Less Harm* offers a fresh and timely perspective for academics, students, and readers interested in the ethical challenges of representing the past.

Programming Literature Rebecca Roach, 2025-12-18. This is a

book about the messy archival worlds of literature and computing and the myriad of relations that have existed between the two Before J M Coetzee was a writer of Nobel Prize winning novels the South African was a programmer for one of the most significant Cold War supercomputer projects in Britain Experimental British writer Christine Brooke Rose worked at Bletchley Park with Alan Turing When not opining about modernism Canadian literary critic Hugh Kenner was a devoted computer hobbyist Literary scholars have often not known what to make of these other careers intimidating irrelevant outside of the scope of literary studies surely When they do make links it is often via the frame of formal logic that has dominated discussions of both computer history and literary modernism This book starts from a different assumption that far from irrelevant these material experiences were significant in the development of the literary projects of writers including Coetzee Brooke Rose Kenner William Gaddis and Kamau Brathwaite It contends that it is in the practice and the archive rather than on the plane of abstraction that we can best see this influence Addressing literary scholars media and computer historians and digital theorists alike *Programming Literature* productively reframes contemporary debates around artificial intelligence the value of the humanities and tech culture by emphasizing just how material these worlds have always been

The Rebirth of Suspense Rick Warner, 2024-09-17 Typically films are suspenseful when they keep us on the edge of our seats when glimpses of a turning doorknob a ticking clock or a looming silhouette quicken our pulses Exemplified by Alfred Hitchcock's masterworks and the countless thrillers they influenced such films captivate viewers with propulsive plots that spur emotional investment in the fates of protagonists Suspense might therefore seem to be a curious concept to associate with art films featuring muted characters serene landscapes and unrushed rhythms in which plot is secondary to mood and tone This ambitious and wide ranging book offers a redefinition of suspense by considering its unlikely incarnations in the contemporary films that have been called slow cinema Rick Warner shows how slowness builds suspense through atmospheric immersion narrative sparseness and the withholding of information causing viewers to oscillate among boredom curiosity and dread He focuses on works in which suspense arises where the boundaries between art cinema and popular genres such as horror thriller science fiction and gothic melodrama become indefinite including Chantal Akerman's *La captive* Apichatpong Weerasethakul's *Memoria* Jonathan Glazer's *Under the Skin* Kelly Reichardt's *Night Moves* Lucrecia Martel's *Zama* Kiyoshi Kurosawa's *Creepy* and David Lynch's *Twin Peaks: The Return* Warner investigates the pivotal role of sound in generating suspense and traces how the experience of suspense has changed in the era of digital streaming *The Rebirth of Suspense* develops a fresh theory history typology and analysis of suspense that casts new light on the workings of films across global cinema

Human Extinction Émile P. Torres, 2023-06-15 This volume traces the origins and evolution of the idea of human extinction from the ancient Presocratics through contemporary work on existential risks Many leading intellectuals agree that the risk of human extinction this century may be higher than at any point in our 300 000 year history as a species This book provides insight on the key questions that inform this discussion including when humans began to

worry about their own extinction and how the debate has changed over time It establishes a new theoretical foundation for thinking about the ethics of our extinction arguing that extinction would be very bad under most circumstances although the outcome might be on balance good Throughout the book graphs tables and images further illustrate how human choices and attitudes about extinction have evolved in Western history In its thorough examination of humanity s past this book also provides a starting point for understanding our future Although accessible enough to be read by undergraduates Human Extinction contains new and thought provoking research that will benefit even established academic philosophers and historians
