[Slides Monkeys: Swinging through the real estate jungle](#) Toh Shaowei, 2025-09-10 Behind every real estate deal is a story that starts with strategy Research and strategy may not make headlines but they shape the decisions that determine skylines portfolios and investment outcomes In this book the author takes readers behind the scenes of real estate investment management revealing how strategists navigate the fast changing global landscape Part memoir part field guide and part career handbook this is a no nonsense account of a profession often misunderstood yet critical to

the business of real estate investing From Tokyo multifamily housing to Sydney logistics warehouses he shows how data and market intelligence become actionable strategies He explains why it is all about understanding people cities and cycles With clear insights and candid anecdotes the book unpacks what strategy really means in practice why it matters and how it drives the machinery of global capital investing in the world s oldest and largest asset class Strategy connects capital cycles and cities What you will find inside A look behind the curtains at how real estate strategists informs capital allocation from deal sourcing to investment decisions and client management The differences between strategy roles across platforms including private equity firms LPs brokerages REITs and advisory groups Musings and personal anecdotes from the author s time in investment banking leading real estate research departments and navigating boardrooms Practical insights on how to write present and argue with conviction when your audience controls capital What makes a good strategist and how not to become just another PowerPoint machine Career advice that cuts across all sectors how to build trust develop a voice and survive in situations where strategy is both respected and ignored This is not a textbook There are no formulas to memorize no jargon thrown around to impress Instead it is a clear eyed take on a profession that blends economics investment theory behavioral nuance and storytelling skills The real estate jungle is full of alphas and predators The strategist The one swinging in the concrete jungle with a spreadsheet in hand trying to make sense of it all In this jungle everyone wants to look like the lion But sometimes it is the monkey who sees the forest clearly Whether you are a student of the built environment trying to find your edge a generalist navigating unfamiliar sectors or a leader wondering what value you really bring to the table Slide Monkeys offers honest hard earned insights with just the right dose of sarcasm While this book draws heavily from the author s experience in Asia Pacific private equity real estate the lessons apply more broadly You could be working in finance consulting technology or a completely different field Yet many of the themes are universal Think influencing without authority navigating ambiguity and building trust If you are looking for a primer into the field or a clearer understanding of what real estate investment professionals actually talk about this is your book If you are simply someone trying to build a thoughtful career in any noisy industry trying to figure out why clarity adaptability and quiet conviction matter more than loud ambition and job titles this is your book
