Tolbert, Scott J. LaCombe, 2021 Digital information drives participation in politics the economy and society Yet great disparities exist as to which communities have access to the internet In 2017 only half of residents of formerly industrial Flint Michigan had broadband or satellite internet at home while over 90 percent of those in thriving Sunnyvale California in Silicon Valley were connected More recently Covid 19 laid bare these persistent digital divides in both urban and rural communities illustrating that broadband use is a fundamental resource for the future of opportunity in communities While previous studies have examined the impacts of broadband infrastructure they have indicated little about the extent to which local populations can afford and use the technology Moreover there has been limited scientific evidence on how broadband adoption matters for collective benefits Including new data on broadband subscriptions from 2000 2017 and comprehensive analysis for U S states counties metros cities and neighborhoods Choosing the Future argues that broadband use in the population is a form of digital human capital that benefits communities as well as individuals Broadband has a causal impact across all types of communities for economic prosperity growth income employment and policy innovation Yet there are urban neighborhoods and rural counties where as little as one quarter of the population has a broadband subscription even when mobile is included As we build smart cities and communities as economies and jobs continue to experience rapid change and as more information and services migrate online it is communities with widespread broadband use that will be best positioned for inclusive innovation with the digital human capital to thrive *Demystifying AI for the Enterprise*

Prashant Natarajan, Bob Rogers, Edward Dixon, Jonas Christensen, Kirk Borne, Leland Wilkinson, Shantha Mohan, 2021-12-30 Artificial intelligence AI in its various forms machine learning chatbots robots agents etc is increasingly being seen as a core component of enterprise business workflow and information management systems The current promise and hype around AI are being driven by software vendors academic research projects and startups However we posit that the greatest promise and potential for AI lies in the enterprise with its applications touching all organizational facets With increasing business process and workflow maturity coupled with recent trends in cloud computing datafication IoT cybersecurity and advanced analytics there is an understanding that the challenges of tomorrow cannot be solely addressed by today's people processes and products There is still considerable mystery hype and fear about AI in today's world A considerable amount of current discourse focuses on a dystopian future that could adversely affect humanity Such opinions with understandable fear of the unknown don't consider the history of human innovation the current state of business and technology or the primarily augmentative nature of tomorrow's AI This book demystifies AI for the enterprise It takes readers from the basics definitions state of the art etc to a multi industry journey and concludes with expert advice on everything an organization must do to succeed Along the way we debunk myths provide practical pointers and include best practices with applicable vignettes AI brings to enterprise the capabilities that promise new ways by which professionals can address both mundane and interesting challenges more efficiently effectively and collaboratively with humans The opportunity for tomorrow's enterprise
