Whether you are a job seeker, sales professional, or consultant, numerous opportunities exist for you to leverage social media to create a competitive edge for yourself. *Online Personal Brand* Ryan M. Frischmann, 2014-07-19. Online personal branding is a requirement for all professionals. The common argument of the experts is you have a digital footprint in social media and on the internet so people are already making impressions of you. Take control of their perceptions. More importantly, you have an opportunity to proactively project your personal brand onto networks. Two other advantages of personal branding are that it forces you to be visionary of your career goals and helps you land favorable employment. This book shares a functional angle to personal branding that is refreshingly simpler than the traditional marketing angle. The definition of an online personal brand is the combination of a skill set, an aura, and an identity, and there is discussion where the concepts overlap.

Chapter 2 explains places to build a brand online with a small budget. Chapter 3 discusses the tools YouTube provides through its video streaming and SEO platform. Chapter 4 shows the various options Facebook outlays with respect to its vast audience, the large community, and its advertising campaigns, managers, and offers. Chapter 5 shows LinkedIn is placed in view for discourse as to how this platform spreads news of one's brand to others in the same field or industry. Chapter 6 looks to express the innumerable possibilities that exist in Twitter, the fastest growing social media platform with one of the most active online communities. Chapter 7 and 8 fully spread out the usefulness of a website in the creation of a personal brand and how the existence and consistency of a blog sets the brand to have a significance in the vast ocean of content called the internet.
