CrowdRising Lorinda R. Rowledge, 2019-07-05 Open innovation enabled through crowdsourcing is one of the hottest topics in management strategy today. Particularly striking and of vital importance to the world are the pioneering efforts to apply crowdsourcing technology and open innovation to solve social, environmental and economic sustainability challenges. CrowdRising sets out these challenges as context and then highlights the experiences of leaders and early adopters, identifies implementation guidelines, critical success factors and lessons learned, and finally projects where the field is going in the future. With a strong focus on the applications of crowdsourcing for innovation, engagement and market intelligence, the book profiles the initiatives of companies, NGOs and technology providers using crowdsourcing to develop these solutions to global problems. It addresses the key challenges impacting organizations: 1. identifying more sustainable ways to design, distribute, transport, recycle and repurpose products; and 2. discovering and implementing the systems needed to transform global economic growth, drive human prosperity and replenish the planet's resources. ROBOT2013: First Iberian Robotics Conference Manuel A. Armada, Alberto Sanfeliu, Manuel Ferre, 2013-11-12 The interest in robotics has remarkably augmented over recent years. Novel solutions for complex and very diverse application fields: exploration, intervention in severe environments, assistive social personal services, emergency rescue operations, transportation, entertainment, unmanned aerial vehicles, medical, etc. has been anticipated by means of a large progress in this area of robotics. Moreover, the amalgamation of original ideas and related innovations, the search for new potential applications and the use of state of the art supporting technologies permit to foresee an important step forward and a significant socio-economic impact of advanced robot technology in the forthcoming years. In response to the technical challenges in the development of these sophisticated machines, a significant research and development effort has yet to be undertaken. It concerns embedded technologies for power sources, actuators, sensors, information systems, new design methods, adapted control techniques for highly redundant systems, as well as operational and decisional autonomy and human-robot co-existence. This book contains the proceedings of the ROBOT 2013 FIRST IBERIAN ROBOTICS CONFERENCE and it can be said that it included both state of the art and more practical presentations dealing with implementation problems, support technologies and future applications. A growing interest in Assistive Robotics, Agricultural Robotics, Field Robotics, Grasping and Dexterous Manipulation, Humanoid Robots, Intelligent Systems and Robotics, Marine Robotics has been demonstrated by the very relevant number of contributions. Moreover, ROBOT2013 incorporates a special session on Legal and Ethical Aspects in Robotics that is becoming a topic of key relevance. This Conference will be held in Madrid, 28-29 November 2013, organised by the Sociedad Española para la Investigación y Desarrollo en Robótica SEIDROB and by the Centre for Automation and Robotics CAR, Universidad Politécnica de Madrid, UPM and Consejo Superior de Investigaciones Científicas CSIC, along with the co-operation of Grupo Temático de Robótica CEA-GTRob, Sociedade Portuguesa de Robotica SPR and Asociación Española de Promoción de la Investigación en Agentes Físicos RedAF. *Black Enterprise*, 2000-06 BLACK ENTERPRISE is the ultimate source for wealth creation for
