Art, Media Design, and Postproduction Eduardo Navas, 2025-05-12. A concise guide to the creative application of appropriation and remix that offers a set of open-ended guidelines for art and design studio-based projects. This book explores creativity with emerging technology, including artificial intelligence. This fully revised and expanded second edition engages with the ongoing recycling and repurposing of content and form and the new directions the emerging form of metacreativity is taking. Art and design as artists continue to expand their creative methodologies. Exploration of metacreativity is new to this edition, with a focus on remix, principles of the implementation of data analysis, and the delegation of parts of the creative process to automated algorithms and artificial intelligence. Each chapter includes an introduction, goals, and guidelines for a studio-based project, with an explanation of relevant history as well as examples and case studies. Each set of guidelines is open-ended, enabling the reader to repurpose the instructional material according to their own methodologies and choice of medium. Navas also provides historical and theoretical context to encourage critical reflection. The second edition remains the first book of guidelines to take into account the historical, theoretical, and practical context of remix as an interdisciplinary act. This is an essential read for those interested in remix studies and appropriation in art, design, and media.
