find that algorithm aversion can be mitigated by making salient the expected time savings offered by the chatbot However gatekeeper aversion is more persistent and harder to overcome We conclude by building and estimating a structural model of channel demand and by proposing a behavior aware service design that reduces the firm's staffing costs by up to 22% *AI for Small Business: Use ChatGPT, Automation, and AI Tools to Streamline Tasks and Boost Profits* Nathan Sterling, 2025-05-04
