Kiaer,2025-01-14 This book demonstrates the importance of raising multilingual children in the UK both for the children's own benefit and for the benefit of society as a whole. Against the backdrop of both the rich linguistic diversity already present in the UK and the challenges faced by any languages other than a few major European languages to find any space in educational contexts, the author challenges the myth that multilingualism hinders English language acquisition and use, instead emphasising the cultural and cognitive advantages of multilingual education and support for home and community languages. The book is a call to action for educators, policymakers and parents, combining practical strategies with research-based insights to support its readers in advocating for multilingual education. It presents a hopeful vision for education in the UK where teachers can combine technological innovations and the linguistic resources of their classrooms and communities to support and promote multilingualism.

AI Algorithms and ChatGPT for Student Engagement in Online Learning

Bansal, Rohit, Chakir, Aziza, Hafaz Ngah, Abdul, Rabby, Fazla, Jain, Ajay, 2024-05-28 The shift to virtual education has presented numerous challenges, including maintaining student focus and participation. Traditional methods of instruction often need to catch up in capturing the attention of digital learners, leading to disengagement and reduced learning outcomes. However, there is a solution at hand. AI Algorithms and ChatGPT for Student Engagement in Online Learning offers a comprehensive approach to leveraging artificial intelligence. AI algorithms and ChatGPT enhance student engagement in digital classrooms. This book addresses the pressing need for innovative strategies to keep students actively involved in their online learning journey. By harnessing the power of AI algorithms, educators can personalize learning paths to suit individual student needs, ensuring that content is relevant and engaging. Additionally, ChatGPT serves as a virtual assistant, providing students with instant feedback and support, fostering a sense of connection to the learning process.

Chatgpt and Other Generative AI Tools Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17

In the past ten years, applications of generative artificial intelligence (GAI) have found rapidly growing use in medicine, science and daily life. Large language models (LLMs) opened up new avenues, in particular for education. LLMs have been used to create interactive educational content for students, stimulate their curiosity, generate code explanations and develop assessment questions. Additionally, LLMs have been applied for language practice, anxiety alleviation and feedback provision. In higher education, LLMs have shown potential for assisting in medical exam preparation and clinical decision making. In school education, LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback. More recently, LLM-based applications such as ChatGPT have been used to generate teaching materials or assessment tasks across different subjects. The field's understanding of the effects of the use of LLM-based applications in classroom teaching, however, is still in its infancy. GAI tools may help solving a range of tasks in education, in particular with respect to teachers and students and teachers' efforts to generate content. However, it is critical that teachers and students do not overly rely on GAI-generated solutions but instead critically assess each solution. Students should furthermore not use GAI tools to avoid investing relevant
