license **Neon Visions** Brannon Costello, 2017-10-11 *Neon Revelations* tracks the groundbreaking career of comics innovator and iconoclastic auteur Howard Chaykin and the impact of his work on the transformation of American comic books in the 1980s. Acclaimed and often controversial projects such as *American Flagg*, *Time2* and *Black Kiss* turned action-packed adventure tales of mainstream comics into a platform for personal expression, political engagement and aesthetic experimentation. Chaykin remains a vital and prolific artist today yet despite the original and influential nature of his comics he has received scant critical attention. Spanning Chaykin's career from his 1980s heyday to the contemporary period, the first book-length study of Chaykin's work locates the unique power of Chaykin's comics in their inventive explorations of the question of authenticity in popular culture. It examines the ways in which Chaykin's work, which demands a mode of reading that is alive to the distinct affordances of the comics medium and the complexities of its history, reveals the limitations of valuing comics narrowly as literature.

Cultures and Globalization Helmut K Anheier, Yudhishtir Raj Isar, 2008-09-17 The world's cultures and their forms of creation, presentation and preservation are deeply affected by globalization in ways that are inadequately documented and understood. The *Cultures and Globalization* series is designed to fill this void in our knowledge. In this series, leading experts and emerging scholars track cultural trends connected to globalization throughout the world, resulting in a powerful analytic tool kit that encompasses the transnational flows and scapes of contemporary cultures. Each volume presents data on cultural phenomena through colourful, innovative information graphics to give a quantitative portrait of the cultural dimensions and contours of globalization. This second volume, *The Cultural Economy*, analyses the dynamic relationship in which culture is part of the process of economic change that in turn changes the conditions of culture. It brings together perspectives from different disciplines to examine such critical issues as the production of cultural goods and services and the patterns of economic globalization; the relationship between the commodification of the cultural economy and the aesthetic realm; current and emerging organizational forms for the investment, production, distribution and consumption of cultural goods and services; the complex relations between creators, producers, distributors and consumers of culture; the policy implications of a globalizing cultural economy. By demonstrating empirically how the cultural industries interact with globalization, this volume will provide students of contemporary culture with a unique, indispensable reference tool.
