The aims are at bringing together researchers, teachers, industries, practitioners from education, information technologies, artificial intelligence, digital pedagogy, digital educational environment, e-learning, gamification, augmented and virtual reality fields to present recent innovations, find topics of common interest and stimulate further development of new approaches. The book serves as a valuable platform for scholars, practitioners and students interested in the latest advancements in information security, management and applications. It provides an opportunity to expand knowledge, establish connections with peers and contribute to the further advancement of the field. The book promises to be an engaging and informative for those passionate about distance learning technologies and its various applications. *Exploring Technology-Infused Education in the Post-Pandemic Era* Tomei, Lawrence A., Carbonara, David D., 2024-08-05 In the aftermath of the 2020-2022 pandemic, educators find themselves grappling with the decision to revert to traditional instructional methods or embrace the transformative power of 21st century technologies. The swift integration of virtual classrooms, videoconferencing and social media during the pandemic has left teachers navigating uncharted territory. Many who once vehemently resisted technology now stand on the precipice of a digital revolution in education. This dichotomy poses a pressing problem: a dearth of documented research and guidance for educators seeking to measure the true value of these technologies in the post-pandemic era. *Exploring Technology-Infused Education in the Post-Pandemic Era* offers guidance and solutions to the challenges faced by educators. As teachers stand on the brink of a pivotal decision, the research community lags behind in providing the necessary insights to inform their choices. The questions loom large: What technologies emerged during the pandemic and have they proven effective in the classroom? Can these innovations seamlessly coexist with traditional instructional methods? The void in documented research leaves educators in a quandary, lacking the evidence needed to make informed decisions about the integration of technology into their teaching practices. This critical gap impedes progress and hinders the unleashing of the full potential of 21st century educational tools. *LISS 2024* Daqing Gong, Yixuan Ma, Jonathan Foster-Pedley, Juliang Zhang, 2025-08-29 This proceedings volume focuses on the AI and data-driven technical and management innovation in logistics informatics and services. In detail, the included scientific papers analyze the latest fundamental advances in the state of the art and practice of logistics informatics, service operations and service science. The

proceedings volume is documentation of LISS 2024 at Cape Town and Beijing in July 26 29 2024 It is co organized by Beijing Jiaotong University Henley Business School Africa Beijing Information Science and Technology University and Beijing Wuzi University
