Marinov, 2023-11-03 Virtual teams can be traced back to the 1990s with the debauched development of communication technologies, as well as the fast extension of the internet. Virtual teams possess unique features allowing them to combine cultural multiplicity, specific tasks, physical remoteness of team members, continuous distant communication, critical interdependence of tasks, leadership, cohesion, empowerment, confidence, virtuality, special trust creation, and trust building. For a successful functioning of present-day organisations, they need to employ geographically dispersed labour force. Creating virtual teams functioning across national borders, organisations secure the most competent talent available world-wide. Employing the best available know-how, virtual teams apply the knowledge of experts from various cultures, having diverse capabilities, as well as varied perceptions on dealing with multiple organisational challenges from strategic perspectives. Compositions of virtual teams operating across national borders alter depending on types of industry, organisation, and organisational unit. International virtual teams functioning across national borders perform from practically everywhere, all over the world, if there is a secure and constant internet connection. This book is dedicated to offering a comprehensive outlook and analysis of the theoretical and practical aspects related to the creation of virtual teams across national borders, as well as the specifics of their implementation. The research published as chapters in the book allows the detection of the key aspects and trends concerning the creation and performance of virtual teams across national borders. The book presents topics not being investigated in depth so far or not researched at all. The purpose of the book is to fill in certain gaps in the existing research, and subsequent publications referring to a broad variety of issues concerning theoretical and empirical fundamentals of the creation of virtual teams and their functioning across national borders, the role of virtual intelligence in relation to distance interpretation in international virtual teams, geography of virtual teams in relation to digital nomads, communication in virtual teams, creation of communal identity via implementation of virtual teams, tax implications for virtual work, among numerous other issues. *Leading Despite Home Office - Effectively Motivating Virtual Teams* Simone Janson, 2025-11-17 Also in the 4th revised and improved edition published by a government-funded
