Faith-Based Education That Constructs HeeKap Lee,2010-08-09 Constructivism is everywhere It is a hot issue at this time in the field of philosophy education technology and religion However can constructivism be an alternative approach in faith based education While some conclude that Jesus knew learning was an active knowledge creating process and that he always encouraged his disciples to think deeply and go beyond the surface level others would find that constructivism undercuts faith based education because of its claims to relativity For example constructivists claim that meaning is imposed on the world by us rather than existing in the world independently from us Thus they proclaim that truth is relative to particular times places and people Christians hold that truth does exist absolutely So how can there be a way forward for faith based educators who see the good in the constructivist approach In Faith Based Education that Constructs readers will find a unique approach whereby constructivism may appropriately be applied to a faith based education setting Although disagreement can occur between constructivism and faith based education this book concludes that constructivist thought and Christian faith based education are in the end congruent and harmonious in significant ways Those faith based educators who continue to hold cautionary views of radical constructivist assertions against absolute truths need not disregard all other aspects of constructivism

Research & Education in Design: People & Processes & Products & Philosophy Rita Almendra,João Ferreira,2020-05-27 Design is about the creation of meaningful connections to solve problems and advance human wellbeing the discipline has always explored the beneficial links between form and function technology and meaning beauty and utility people and artefacts and problems and solutions among others This book focuses on the crucial connection between design research and design education Contemporary society grows increasingly hyper complex and globally competitive This state of affairs raises fundamental questions for both Design Education and Design Research Should research skills be integrated into undergraduate courses How can we modify design courses without compromising the positive aspects of the educational studio experience Can the three cycles of higher education in design be combined into a creative and inquisitive educational continuum To examine the relationship between research and education in Design we must address the topic of knowledge keeping in mind that the development and dissemination of new and useful knowledge is the core purpose of a University If we agree that design has its own things to know and ways to find out about them then design knowledge resides in people processes products and philosophy This book explores the intersection of these four areas with the aim of uncovering insights to advance the current state of the design discipline
