The historical workplace disparities experienced by women such as pay gaps and underrepresentation in leadership have been exacerbated by the pandemic. Already penalized for motherhood, the ability to work virtually and remotely offered an opportunity to democratize the workplace giving women greater flexibility in managing their non work responsibilities while fulfilling their work obligation. Nevertheless VR work also has a tendency to make women more invisible and therefore less likely to have networking opportunities and more likely to be overlooked for promotions. The author explores these challenges and opportunities faced by women in the era of VR work and addresses some human resource development HRD issues that contribute to the talent retention of VR women workers and offers models, theories and frameworks to examine the challenges and opportunities women encounter in VR work environments. This book will appeal to HR scholar and scholar practitioners interested in the ongoing hurdles confronting women in the professional sphere despite the new opportunities presented through VR work. It also appeals to gender studies scholars who are interested in VR work's effect on women.
