*A Bourdieusian Analysis of 64 Students Pursuing a Second Chance in a Community College in Hong Kong* Yi-Lee Wong, 2022-07-06 A continuous expansion of higher education has made it possible not only for more students to get straight into university but also for more students to obtain a university place at their second attempt immediately after their first attempt fails. However, the educational experiences of students who seek such a second chance have been under-examined. In filling this empirical gap, this book offers an application of Bourdieu's analysis of class reproduction through education together with his three concepts of habitus, cultural capital, and field, and the concept of emotional capital derived from an extension of his framework to make sense of educational experiences of 64 community college students who seek such a second chance in Hong Kong. The option of community college as a second chance became available in Hong Kong in the year 2000. The book explores how specific characteristics of community college in Hong Kong impact on the ways in which respondents of the middle and working classes see and feel about their selves throughout the course of pursuing this second chance. It also revisits Bourdieu's framework and suggests the possibility of theorising an observed class contrast in orientation to making sense of academic challenges posed in educational contexts as a form of classed habitus of middle class situational interpretation as opposed to working class direct understanding.

*Soulware* Way Kuo, 2019-04-24 This book is a critical account of the history, evolution, and challenges of higher education in mainland China, Taiwan, and Hong Kong, with important reflections on other systems, notably those in the US, UK, Korea, and Japan. In addition to hardware and software, it introduces the concept of Soulware in global higher education and analyses its importance for internationalization and the pursuit of excellence. In an age where robots and artificial intelligence are impacting our jobs and our daily lives, its critical analysis and insightful reflections provide considerable value for a range of global stakeholders interested in higher education reform to nurture talent and promote innovation to prepare students for an unpredictable future. Professor Kuo's perspective provides considerable value for a range of global stakeholders both in the east and the west. As American universities awake to the realization that the demand for higher education is an increasingly global phenomenon, his contribution could not be more timely.

Mike Crow, PhD, President, Arizona State University Way Kuo advances a powerful historical argument for the means to achieve excellence in Asian universities. His recipe is bold leadership combining excellence in teaching and research and embracing the lessons of western university successes and failures. A superb combination of history and forward thinking.

Michael Kotlikoff, VMD, PhD, Provost, Cornell University Way's book is not just about the past or the present. Rather, it offers useful insights into the future. In an age where robots and artificial intelligence are impacting our jobs and our daily lives, he introduces the concept of soulware and analyzes its importance for higher education.

G. P. Bud Peterson, PhD, President, Georgia Institute of Technology Differing from their Western counterparts, Chinese universities will demonstrate their own cultural characteristics. In this regard, Professor Kuo's book offers us many
