Haines, Richard H. Steckel, 2000-08-15 Professors Haines and Steckel bring together leading scholars to present an expansive population history of North America from pre Columbian times to the present Covering the populations of Canada the United States Mexico and the Caribbean including two essays on the Amerindian population this volume takes advantage of considerable recent progress in demographic history to offer timely knowledgeable information in a non technical format A statistical appendix summarizes basic demographic measures over time for the United States Canada and Mexico      **Colonial Population** Robert Rene Kuczynski, 1937      **The Atlantic Frontier of the Thirteen American Colonies and States** Jacob M. Price, 2024-10-28 The external economy of British North America has attracted considerable scholarly attention in the last two generations and the papers reprinted here in this second collection from Jacob Price make important contributions to quantification conceptualisation and debate Studies presenting and analysing new statistical material from the English and Scottish customs accounts are supplemented by a general survey of the transatlantic economy in the 18th century which is required reading for all students of the subject Price's treatment is diversified into financial arrangements and the role of credit in the slave trade and plantation economies In a provocative chapter Who cared about the colonies concern in Britain for the 13 colonies between 1714 and 1775 is explored in terms of the ability of the colonies to involve the interests and command the attention and concern of people in Britain from the politically eminent to those in trade and to the nation at large      Colonial America Jerome Reich, 2016-07-01 This brief up to date examination of American colonial history draws connections between the colonial period and American life today by including formerly neglected areas of social and cultural history and the role of minorities African Americans Native Americans women and laboring classes It summarizes and synthesizes recent studies and integrates them with earlier research Key topics European Backgrounds The Native Americans The Spanish Empire in America The Portuguese French and Dutch Empires in America The Background of English Colonization The Tobacco Colonies Virginia and Maryland The New England Colonies The Completion of Colonization Seventeenth Century Revolts and Eighteenth Century Stabilization Colonial Government African Americans in the English Colonies Immigration Colonial Agriculture Colonial Commerce Colonial Industry Money and Social Status The Colonial Town The Colonial Family Religion in Colonial America Education in Colonial America Language and Literature Colonial Arts and Sciences Everyday Life in Colonial America The Second Hundred Years War The Road to Revolution The Revolutionary War Governments for a New Nation Market For anyone interested in Colonial History American Revolution or Early American Social History      Colonial Population Robert René 1876-1947 N 87 Kuczynski, 2021-09-09 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United

**National Colors** Mara Loveman, 2014-06-06 The era of official color blindness in Latin America has come to an end For the first time in decades nearly every state in Latin America now asks their citizens to identify their race or ethnicity on the national census Most observers approvingly highlight the historic novelty of these reforms but *National Colors* shows that official racial classification of citizens has a long history in Latin America Through a comprehensive analysis of the politics and practice of official ethnoracial classification in the censuses of nineteen Latin American states across nearly two centuries this book explains why most Latin American states classified their citizens by race on early national censuses why they stopped the practice of official racial classification around mid twentieth century and why they reintroduced ethnoracial classification on national censuses at the dawn of the twenty first century Beyond domestic political struggles the analysis reveals that the ways that Latin American states classified their populations from the mid nineteenth century onward responded to changes in international criteria for how to construct a modern nation and promote national development As prevailing international understandings of what made a political and cultural community a modern nation changed so too did the ways that Latin American census officials depicted diversity within national populations The way census officials described populations in official statistics in turn shaped how policymakers viewed national populations and informed their prescriptions for national development with consequences that still reverberate in contemporary political struggles for recognition rights and redress for ethnoracially marginalized populations in today's Latin America

**Strangers Within the Realm** Bernard Bailyn, Philip D. Morgan, 2012-12-01 Shedding new light on British expansion in the seventeenth and eighteenth centuries this collection of essays examines how the first British Empire was received and shaped by its subject peoples in Scotland Ireland North America and the Caribbean An introduction surveys British imperial historiography and provides a context for the volume as a whole The essays focus on specific ethnic groups Native Americans African Americans Scotch Irish and Dutch and Germans and their relations with the British as well as on the effects of British expansion in particular regions Ireland Scotland Canada and the West Indies A conclusion assesses the impact of the North American colonies on British society and politics Taken together these essays represent a new kind of imperial history one

that portrays imperial expansion as a dynamic process in which the outlying areas not only the English center played an important role in the development and character of the Empire The collection interprets imperial history broadly examining it from the perspective of common folk as well as elites and discussing the clash of cultures in addition to political disputes Finally by examining shifting and multiple frontiers and by drawing parallels between outlying provinces these essays move us closer to a truly integrated story that links the diverse ethnic experiences of the first British Empire The contributors are Bernard Bailyn Philip D Morgan Nicholas Canny Eric Richards James H Merrell A G Roeber Maldwyn A Jones Michael Craton J M Bumsted and Jacob M Price      **Proceedings of the Royal Colonial Institute** Royal Colonial Institute (Great Britain),1880      The Economic Review ,1921      Colonial Population By Robert R.
