by which the early Americans forged the economy of the New World In the tiny coastal settlements which usually sprang up around a mill or near a tanyard the first craftsmen set up their trades The blacksmith cooper joiner weaver cordwainer and housewright working alone or with several assistants invented their own tools and devised their own methods Soon they were making products that far surpassed their early models the American ax was so popular that English ironmongers often labeled their own axes American to sell them more readily In the town squares a colonist could have his bread baked to order bring in his wig to be curled have his eyeglasses ground his medicine prescription filled or buy snuff for his many pocket boxes With the thriving trade in bespoke or made to order work fine American styles evolved many of these are priceless heirlooms now the silverware of Paul Revere and John Coney redware and Queensware pottery Poyntell hand blocked wallpaper the Kentucky rifle Conestoga wagon and the iron grillework still seen in some parts of the South The author discusses in detail many of the trades which have since developed into important industries like papermaking glassmaking shipbuilding printing and metalworking often reconstructing from his own careful research the complex equipment used in these enterprises The ingenious liberty loving artisans left few written records of their work and only Mr Tunis with his painstaking attention to authentic detail and his vast knowledge could present such a complete treasury of the way things were done before machines obliterated this phase of early American life     The Craftsman ,1909     **The American Work**

**Ethic and the Changing Work Force** Herbert Applebaum,1998-06-25 A major force in American society the work ethic has played a pivotal role in U S history affecting cultural social and economic institutions But what is the American work ethic Not only has it changed from one era to another but it varies with race gender and occupation Considering such diverse groups as Colonial craftsmen slaves 19th century women and 20th century factory workers this book provides a history of the American work ethic from Colonial times to the present Tracing both continuities and differences the book is divided into sections on the Colonial era the 19th century and the 20th century and includes chapters on both major occupational groups such as farmers factory workers laborers and gender racial and ethnic minorities This approach which covers all major groups in U S history enables the reader to discern how the work ethic applied to different occupational and ethnic groups over time The book subjects the work ethic to an analysis based on historical sociological economic and anthropological perspectives and provides an analysis of current thinking about how the work ethic applied to various groups and classes in different historical periods     **Jeremiah Dummer, Colonial Craftsman & Merchant, 1645-1718** Hermann Frederick
