Colonialism And Science:

Colonialism and Science James E. McClellan III, 2010-10-15 How was the character of science shaped by the colonial experience In turn how might we make sense of how science contributed to colonialism Saint Domingue now Haiti was the world's richest colony in the eighteenth century and home to an active society of science one of only three in the world at that time In this deeply researched and pathbreaking study of the colony James E McClellan III first raised his incisive questions about the relationship between science and society that historians of the colonial experience are still grappling with today Long considered rare the book is now back in print in an English language edition accompanied by a new foreword by Vertus Saint Louis a native of Haiti and a widely acknowledged expert on colonialism Frequently cited as the crucial starting point in understanding the Haitian revolution *Colonialism and Science* will be welcomed by students and scholars alike By deftly weaving together imperialism and science in the story of French colonialism McClellan brings to light the history of an almost forgotten colony *Journal of Modern History* McClellan has produced an impressive case study offering excellent surveys of Saint Domingue's colonial history and its history of science Isis **Science Studies Meets Colonialism** Amit Prasad, 2022-10-06 The field of science and technology studies has long critiqued the idea that there is such a thing as a universal and singular Science that exists independently of human society interpretation and action However the multiple significant ways in which colonial legacies impact and shape this project have often remained out of sight at the edges of the discipline In this important book Amit Prasad seeks to rectify this erasure demonstrating that problematic idealized imaginaries of science scientists and the scientific realm can be traced back to the birth of modern science during European colonialism Such visions of science and technology have undergirded the imagination of the West and thus of its others constructing hierarchies of technological innovation and scientific value but also unexpectedly leaving society vulnerable to contemporary threats of misinformation and conspiracy theories as has been strikingly evident during the COVID 19 pandemic Far from being an indictment of STS this rigorous book seeks to highlight such concerns to make STS engage more carefully with issues of colonialism and thus to enable readers to understand the rapidly changing global topography of science and technology today and into the future *Science Across the European Empires, 1800-1950*

Benedikt Stuchtey, 2005 The volume investigates how the British French German and Dutch empires influenced or were influenced by scientific exploration as a means Western culture used to gain entry to the non Western world from around 1800 to the middle of the 20th century The transnational perspective aids an understanding and comparison of the sciences as an instrument which the colonial powers employed to gain economic advantage and political control The essays pay tribute to the metropolitan centre and colonial periphery viewpoints and to the different ways in which imperial expansion occurred Science had specific meanings in the specific historical realities of European colonialism the European case studies present similarities and differences in their imperial systems and in the way in which science was used in relation to the level

Osborne, **The Dai and the Indigenous** Asha Achuthan, 2024-11-15 This is a book about the dai or traditional birth practitioner and her place in the emerging therapeutic domain in colonial and contemporary India The book employs a caste informed feminist reading of the colonial archive against the grain and explores papers by Englishwomen physicians texts of indigenous medicine and practitioner accounts administrative documents public commentaries and legislative assembly debates from the 19th and early 20th centuries It also examines contemporary healthcare policy discourse Using these methodologies the author traces the production of the dai as an unsanitary unskilled indigenous figure in colonial and nationalist accounts The book goes on to examine the workings of gender and caste in the setting up of this figure at first for containment and then for removal from institutionalized healthcare an exercise that is more or less completed in the present The author argues that this exercise is part of the refashioning of the indigenous and of indigenous medicine throughout this period into a highly codified domain that centres caste privilege and is supported by global capital networks In such a refashioning the dai figure is rendered remote not only from the centre of the healthcare apparatus but also from the centre of the contemporary nation This genealogical tracing of indigenous medicine in Indian contexts rather than separate histories is also useful to understand better what is termed the healthcare assemblage today
