How to Choose Colors in Art

complementary

Complementary colors basically sit opposite each other on the color wheel and they create contrast.

split-complementary

If you look at complements like purple and yellow and you break yellow to its neighbors.

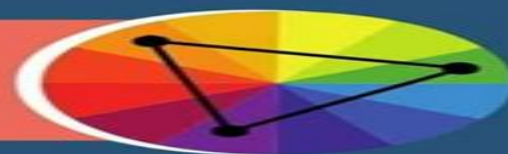

analogous

Analogous colors are colors next to each other on the color wheel, in groups of three.

triadic

Form a triangle with equal sides on the color wheel – you connect three colors that create a triadic combo.

rectangular

Whereas triadic is like a triangle view, tetradic is more of a rectangular connection between colors.

monochromatic

use only one shade color (hue) and its tints and shades (its lighter and darker versions) and no other color whatsoever.
