Color and Weave Design:

Huck Lace Weaving Patterns with Color and Weave Effects Tom Knisely, 2019-10-28 Join expert weaver and teacher Tom Knisely in his exploration of Huck Lace. Lace Weaves are best described as loom controlled warp and weft floats on a Plain Weave ground fabric. The term Color and Weave Effects refers to a careful arrangement of light and dark colored threads in the warp and weft that weave into beautiful patterns. Log Cabin is probably the best known color and weave pattern. Combining Huck with Color and Weave orders opened the door to astonishing pattern possibilities. He then came up with four color arrangements: Light and Dark, Complimentary Colors, Monochromatic and Triadic colors. With 144 patterns and four color themes for each pattern that's 576 patterns. Each pattern includes the full draft and a woven sample for reference. Tom also includes full details for five projects that are perfect for weaving: Huck dish towels, mug rugs, baby blanket and two scarves. Huck Lace Weaving Patterns with Color and Weave Effects is an essential resource that you will turn to for inspiration and guidance again and again.

Structural Textile Design Yasir Nawab, Syed Talha Ali Hamdani, Khubab Shaker, 2017-05-19 The properties of woven and knitted fabrics differ largely due to the path yarn follows in the fabric structure. This path determines the fabric's physical properties, mechanical properties and appearance. A slight variation to the design may result in entirely different properties for the fabric. Structural Textile Design provides detailed insight on different types of designs used for the production of woven and knitted fabrics, highlighting the effect design has on a fabric's properties and applications. With focus on the techniques used to draw designs and produce them on weaving and knitting machines, this book will be of great interest to textile engineers, professionals and graduate students in textile technology and manufacturing.
