Photo-texts Andy Stafford, 2010-01-01 What do photographs want Do they need any accompaniment in today's image saturated society Can writing inflect photography or vice versa in such a way that neither medium takes precedence Or are they in constant inexorable battle with each other Taking nine case studies from the 1990s French speaking world from France North Africa and the Caribbean this book attempts to define the interaction between non fictional written text caption essay fragment poem and photographic image Having considered three categories of intermediality between text and photography the collaborative the self collaborative and the retrospective the book concludes that the dimensions of their interaction are not simple and two fold visuality versus alongside textuality but threefold and therefore complex Thus the photo text as defined here is concerned as much with orality the demotic the popular the vernacular as it is with visual and written culture That text image collaborations give space to the spoken spectral traces of human discourse suggests that the key element of the photo text is its radical provisionality *Colors*, 1998 *Nuovi casi per il cacciatore di libri* Simone

Fabrica 10 Renzo Di Renzo, Elisabetta Prando, Omar Valpinari, 2004 What place do images hold among other kinds of historical evidence In *Eyewitnessing* Peter Burke reviews graphics photographs films and other media from many countries and periods and examines their pragmatic uses This profusely illustrated book surveys the opportunities and the challenges of using images to understand other times In a thorough and compelling defense of the importance of the visual to history Burke argues that images should not be considered mere reflections of their time and place but rather extensions of the social contexts in which they were produced The author describes and evaluates the methods by which art historians have traditionally analyzed images and finds them insufficient to deal with the complexities of visual imagery In developing a richer mode of visual interpretation Burke devotes much attention to religious icons and narratives and political propaganda posters caricatures and maps *Eyewitnessing* also addresses the economics of images some such as films are commodities in themselves and others are created to advertise other products Concentrating on the representation of social groups the author explores stereotypes as well as notions of foreignness and gender In this wide ranging highly accessible volume Burke helps us to understand the promise and the pitfalls of using visual evidence in the writing of history
