The Dictionary of Colors and Colored Words Peter Isaacs, 2022-10-14 The Dictionary of Colors and Colored Words is the world's only true and comprehensive collection of lexically verifiable colors and colored words. With this dictionary, individuals near and far now have anytime access to a credible, trusted, and reliable lexical partner to help in absorbing, engaging, exploring, discovering, learning, referencing, maneuvering, and operating within and around the world of color, colors, and colored words. This colorific repository, which has well over 500 individual specific colors spread over 280 pages, is organized and presented in abecedarian format and includes three special bonus sections: nouns only, adjectives only, and verbs only. Some of the entries, which span almost every area, discipline, or field, also include parenthesized boldface guidance as to where they are primarily used, as in art, painting, zoology, biology, botany, chemistry, medicine, dentistry, cartography, crystallography, gemology, mineralogy, psychology, ophthalmology, dermatology, anthropology, entomology, ornithology, computing, digital imaging, graphic arts, astronomy, mathematics, physics, meteorology, photography, printing, publishing, broadcasting, electronics, and optics. Additionally, all colors and certain colored words are assigned a six-digit alphanumeric hexadecimal code that allows for precise color matching, classification, confirmation, or reproduction on any digital platform or elsewhere.
