Combinatorial Morphology:

Combinatorial Morphology John T. Stonham, 1994-12-01 This book presents a detailed examination of the most important arguments for a process based theory of morphology and offers a highly constrained alternative to the powerful mechanisms proposed in processual theories of morphology Data is presented from dozens of different languages from numerous language families around the world much of it new to the linguistic forum The importance of prosodic morphology in the analysis of linguistic phenomena is highlighted and the need for greater constraints on generative power is examined This work addresses some of the thorniest problems in morphological theory in a novel alternative fashion including the issues of ablaut exchange rules metathesis reduplication and subtraction and presents reanalyses based on moraic morphology and the traditional notion of combination of morphemes along with the underlying theme of constraining the grammar of natural language to the utmost Contributions to the field include i new data from Nitinaht reduplicative constructions Nootka hypocoristic formation and Nootkan variable length vowels ii reanalyses of previous problems including metathesis in Chawchila Yokuts Hebrew and Saanich exchange rules in Luo Dinka and Diegue o and truncation in Danish iii analyses of new problems from reduplication in Nitinaht and Nootka templatic morphology and iv new theoretical apparatus is introduced the unification of templates and a new proposal for hierarchical syllable structure based on the mora as head of N

Asymmetry and Markedness Theory II Shen Jiaxuan, 2025-09-23 This second volume examines asymmetry in language by focusing on how linguistic form and meaning align or diverge Building on the concepts introduced in Volume 1 this volume analyzes symmetry and asymmetry in form meaning relations using examples from antonym pairs subject object contrasts and the markedness patterns of adjectives It integrates several linguistic levels emphasizing how functional and cognitive factors drive these phenomena The concluding discussion posits that asymmetry persists as a core feature of language whereas symmetry is conditional and transient This volume will appeal to linguists language educators and anyone seeking deeper insights into linguistic structure and function particularly in Chinese linguistics markedness research and comparative language studies

The Oxford Handbook of Morphological Theory Jenny Audring, Francesca Masini, 2019 This volume is the first handbook devoted entirely to the multitude of frameworks adopted in the field of morphology It offers critical discussions of the main theoretical issues in word formation and inflection a detailed guide to each morphological theory and explorations into the relationship between morphological theory and other fields

Morphologies of Asia and Africa Alan S. Kaye, 2007-01-01 In 1997 Eisenbrauns published the highly regarded two volume *Phonologies of Asia and Africa* edited by Alan Kaye with the assistance of Peter T Daniels and the book rapidly became the standard reference for the phonologies of the Afro Asiatic languages Now the concept has been extended and Kaye has assembled nearly 50 scholars to write essays on the morphologies of the same language group The coverage is complete copious and again will likely become the standard work in the field Contributors are an international Who's Who of Afro Asiatic linguistics from Appleyard to

Leslau to Voigt It is with great sadness that we report the death of Alan Kaye on May 31 2007 while these volumes were in the final stages of preparation for the press Alan was diagnosed with bone cancer on May 1 while on research leave in the United Arab Emirates and was brought home to Fullerton by his son on May 22

Morphologically complex words in the mind/brain Alina Leminen, Harald Clahsen, Minna Lehtonen, Mirjana Bozic, 2016-04-07 The question of how morphologically complex words assignment listened are represented and processed in the brain has been one of the most hotly debated topics in the cognitive neuroscience of language Do complex words engage cortical representations and processes equivalent to single lexical objects or are they processed as sequences of separate morpheme like units Research on morphological processing has suggested that adults make efficient use of both lexical i e whole word storage and retrieval as well as combinatorial computation in processing morphologically complex words Psycholinguistic studies have

demonstrated that processing of complex words can be affected both by properties of the morphemes and the whole words such as their frequency transparency and regularity Furthermore this research has been informative about the time course of complex word recognition and production and the role of morphological structure in these processes At the neural level left hemisphere inferior frontal and superior temporal areas and negative going event related potentials have been consistently associated with morphological processing While most previous research has been done on the recognition of morphologically complex words in adult native speakers much less is known about neurocognitive processes involved in the on line production of morphologically complex words and even less on morphological processing in children and non native speakers Moreover we have limited understanding of how linguistically distinct morphological processes e g inflectional listen ed versus derivational assign ment are handled by the cortical language networks This e book provides an up to date overview of the questions currently addressed in the field of morphological processing It highlights the significance of morphological information in language processing both written and spoken as assessed by a variety of methods and approaches It also provides a comprehensive range of research and development tools for the development of new technologies
