Advanced Abnormal Psychology

Michel Hersen,Vincent B. Van Hasselt,2012-12-06 Although senior undergraduate psychology students and first year master s and doctoral level students frequently take courses in advanced abnormal psychology it has been almost two decades since a book by this title has appeared Professors teaching this course have had a wide variety of texts to select from that touch on various aspects of psychopathology but none has been as comprehensive for the student as the present volume Not only are basic concepts and models included but there are specific sections dealing with childhood and adolescent disorders adult and geriatric disorders child treatment and adult treatment We believe the professor and advanced student alike will benefit from having all the requisite material under one cover Our book contains 26 chapters presented in five parts each part preceded by an editors introduction The chapters reflect updates in the classification of disorders i e DSM IV In Part I Basic Concepts and Models the chapters include diagnosis and classification assessment strategies research methods the psychoanalytic model the behavioral model and the biological model Parts II Childhood and Adolescent Disorders and III Adult and Older Adult Disorders bulk of the book To ensure cross each containing seven chapters represent the chapter consistency each of these chapters on psychopathology follows an identical format with the following basic sections description of the disorder epidemiology clinical picture with case description course and prognosis familial and genetic patterns and diagnostic

considerations The Millon Inventories Theodore Millon, Caryl Bloom, 2008-04-18 Now in a substantially revised and expanded second edition this important work thoroughly details the full range of clinical assessment tools developed by Theodore Millon and his associates Presented is the most current authoritative overview of the Millon Clinical Multiaxial Inventory MCMI as well as comprehensive information on widely used instruments for such specific populations as adolescents preadolescents medical patients and college students With a heightened focus on clinical practice the second edition offers explicit guidance for linking assessment to individualized evidence based treatment planning and intervention Many of the chapters are entirely new reflecting significant research advances and the development of new inventories

Health and Suffering in America Robert T. Fancher, 2017-07-12 Health and Suffering in America analyzes how we came to see various forms of suffering as mental illness and argues that social and historical dynamics not scientific discovery gave us this notion Robert Fancher argues that the beliefs of mental health professionals have less to do with science than with the professions own values and ideologies The image we have of mental health care hides vast realms of unexamined assumptions In effect the author maintains that mental health consists of mental health professionals ideas about how people ought to live and act not discoveries about human nature The body of the book consists of detailed analyses and critiques of four influential American cultures of therapy psychoanalysis behaviorism cognitive therapy and biological therapy Fancher emphasizes how heavily their concepts and methods are determined by their cultures rather than by empirical data Furthermore our notions of mental health are not scientific discoveries but moral ideals Yet mental health workers often fail to understand this As a result they misunderstand their own authority and worse fail to subject their moral ideals to appropriate moral and cultural criticism The new introduction by the author explores how the rise of managed health care coalesces with insistence on parity for mental health problems supported by continuing claims that mental health care is science based Integrative Assessment of Adult Personality T. Mark Harwood, Larry E. Beutler, Gary

Groth-Marnat, 2012-11-15 A complete thorough and pragmatic guide to clinical assessment this authoritative book meets a key need for both students and practitioners T Mark Harwood Larry E Beutler Gary Groth Marnat and their associates describe how to construct a moving picture of each patient by integrating data from a variety of sources Included are detailed systematic reviews of widely used instruments together with strategies for selecting the best methods for particular referral questions Readers learn to conduct integrated assessments that take the complexities of the individual personality into account serve as the basis for developing an effective treatment plan and facilitate meaningful reporting and client feedback New to This Edition Incorporates the latest research findings and assessment treatment planning tools Chapters on the Personality Assessment Inventory and the NEO PI R and NEO PI 3 A new extended case example runs throughout the chapters Critically evaluates the recently published MMPI 2 RF **Journal of Psychopathology and Behavioral**

Assessment , 1988 Personality and Psychopathology: Building a Clinical Science Theodore Millon, 1996 In Personality

and Psychopathology Millon provides the reader with a coordinated series of papers that illustrate his unprecedented model for building a unified science of personology and psychopathology In this effort he seeks to integrate previously disparate components into a clinical science Rather than developing independently and being left to stand as largely unconnected functions Millon argues that a truly mature clinical science will embody explicit 1 theories that is explanatory and heuristic conceptual schemes that enable the development of a formal 2 nosology a taxonomic classification of disorders that is devised logically from the theory and which permits the development of coordinated 3 instruments tools that are empirically grounded and sufficiently sensitive quantitatively to enable the theory s hypothesis to be adequately investigated and from which target areas can be specified for 4 interventions strategies and tactics of therapy designed in accord with the theory
