between crime and the concept of defensible space in environmental design Another study reports the systematic observation of delinquent children interacting with their parents and ascribes an active role to children in their own socialization showing how antisocial children train parents and teachers to cease making demands Papers in the second part of this volume use conceptual schemes derived from disciplines outside sociology A study of family violence develops the thesis that the ultimate origins and current distribution of child abuse may be found in a single principle of evolutionary biology A paper examining behavior patterns of aggression attachment and violence questions Sutherland's subculture of violence theses by showing how pursuits of basic sociability can result in violent behavior contrary to the values of the group Papers on juvenile delinquency and group home treatment represent approaches using a combination of psychological learning principles and differential association NCJRS modified
