V. Ikonnikov, 1975      **Behind the Iron Curtain** Feliks Novikov, 2016 The prominent architect Felix Novikov was born in 1927 when the famous Constructivist Konstantin Melnikov was at the peak of his career Novikov tells the dramatic story of Soviet architecture portraying the conditions he worked in and how he collaborated with the government and other participants during the creative process He further explains how Soviet design and planning institutes were organized with reference to the Union of the Architects of the USSR and describes the creative ideals of his generation of architects who are today identified as Soviet Modernists As a time witness his memories cannot be recounted in their whole complexity by historians Novikov also describes some of the conditions that affected his own creative fate and that of others This book reflects the characteristics of Soviet life and its connections to architects professional activity Novikov's confessions are more than that of an architect they give a testimony to daily life in the Soviet Union from Stalin to glasnost

Soviet Architecture, 1917-1962 Anatole Senkevitch, 1974 Traces the role of the draft horse throughout history and describes the characteristics of some of the most popular breeds including the Belgian Clydesdale Percheron Shire and Suffolk      Blueprints and Blood Hugh D. Hudson, Jr., 2015-03-08 Analyzing totalitarianism from below in a crucial area of Soviet culture Hugh Hudson shows how Stalinist forces within the architectural community destroyed an avant garde movement of urban planners and architects who attempted to create a more humane built environment for the Soviet people

Through a study of the ideas and constructions of these visionary reformers Hudson explores their efforts to build new forms of housing and settlements designed to free the residents especially women from drudgery allowing them to participate in creative work and to enjoy the songs of larks Resolving to obliterate this movement of human liberation Stalinists in the field of architecture unleashed a little terror from below prior to Stalin's Great Terror Using formerly secret Party archives made available by perestroika Hudson finds in the rediscovered theoretical work of the avant garde architects a new understanding of their aims He shows for instance how they saw the necessity of bringing elite desires for a transformed world into harmony with the people's wish to preserve national culture Such goals brought their often divided movement into conflict with the Stalinists especially on the subject of collectivization Hudson's provocative work offers evidence that in spite of the ultimate success of the Stalinists the Bolshevik Revolution was not monolithic at one time it offered real architectural and human alternatives to the Terror Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Russia Richard Anderson, 2015-11-15 This book offers a comprehensive account of Russia's architectural production from the late nineteenth century to the present explaining how its architecture was both shaped by and came to embody Russia's rapid cultural economic and social revolutions over the past century Richard Anderson looks at Russia's complex relationship to global architectural culture exploring the country's central presence in the Rationalism and Constructivism movements of the 1920s as well as its role as a key protagonist during the Cold War Looking deeply at Soviet Russia he brings the relationship between architecture and socialism into focus through detailed case studies that situate buildings and architectural concepts within the socialist milieu of Soviet society He tracks the way Russian architectural institutions departed from the course of modernism being developed in capitalist countries and he reappraises the architecture of the Stalin era and the final decades of the USSR Finally he traces the influence of Soviet conventions on contemporary Russian architecture which is now a more heterogeneous mix of approaches and styles and how it made a lasting and little known impact on territories extending from the Middle East to Central Asia and into China A bold new assessment of Russia's architectural legacy and contemporary contributions this book is a fascinating exploration of a tumultuous place and the creativity that has come from it

Built from Below: British Architecture and the Vernacular Peter Guillery, 2010-09-13 This book extends the concept of British vernacular architecture beyond its traditional base of pre modern domestic and industrial architecture to embrace other buildings such as places of worship villas hospitals suburban semis and post war mass housing Engaging with wider issues of social and cultural history this book is of use to anyone with an interest in architectural history Presented in an essentially

chronological sequence from the medieval to the post war diverse fresh viewpoints in the chapters of this book reinforce understanding of how building design emerges not just from individual agency that is architects but also from the collective traditions of society     Problems of Communism ,1954     Brodsky & Utkin Lois Nesbitt,Alexander Brodsky,Ilya Utkin,2003-07 Alexander Brodsky and Ilya Utkin are the best known of a loosely organized group of Soviet artists known as Paper Architects who designed much but built little in the early days of Glasnost in the late 1980s Many of their elaborate etchings in which they depicted outlandish often impossible structures and cityscapes of allegorical content were collected in our 1990 book Brodsky Utkin Now with the addition of forty three new and never before published prints we are pleased to announce this updated edition In their designs by turns funny cerebral and deeply human Brodsky Utkin borrow from Egyptian tombs Ledoux s visionary architecture Le Corbusier s urban master plans and other historical precedents collaging these heterogeneous forms in learned and layered scrambles Underlying the wit and visual inventiveness is an unmistakable moral that the dehumanizing architecture of the sort seen in Russian cities in the 1980s and 1990s and elsewhere around the globe takes a sinister toll A new preface assesses the works of Brodsky Utkin and reminds us that the greatest art is often born of adversity Beautifully printed in 300 screen dry trap duotones by the Steinhauer Press Brodsky Utkin is a book for artists architects and collectors alike     *Architecture in the Baltic States* Marco Falsetti,2025-11-20 This book explores the architecture of the Baltic States a region still relatively unexplored in architectural literature Nevertheless this collection of chapters provides readers with a comprehensive overview of the urban architectural environment of the three countries that make up the Baltic region Lithuania Latvia and Estonia Organised in three parts with each part focusing on one of the three Baltic States plus a fourth smaller section dedicated to the large complexes of the Spa Towns the book contains contributions from leading authorities on the subject including planners architects historians geographers and semioticians Each part is organized thematically heritage and legacy urban history progress towards modernity and contemporary architecture with the overall aim of the book being to present the architectural issues and cultural directions of architecture in the Baltic countries The relative peripherality of the Baltic area has throughout its history led to the emergence of a strong tendency towards experimentation alongside the distinctive urban fabric of medieval Tallinn baroque Vilnius and 20th century Riga This book therefore offers readers an indispensable overview of the continuous transformation of the urban architectural environment in the Baltic region *Architecture in the Baltic States* will be of interest to researchers and students of architecture urban history urban morphology and heritage     *Contemporary Architects* Ann Lee Morgan,Colin Naylor,1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor s

note The Struggle for Utopia Victor Margolin, 1997 Focusing on the difficult relationship between art and social change Margolin brings important new insights to our understanding of the avant garde's role in a period of great political complexity **Queer(ing) Russian Art** Brian James Baer, Yevgeniy Fiks, 2023-09-12 While the topic of queer sexuality in imperial Russia and the Soviet Union has been investigated for decades by scholars working in the fields of sociology history literary studies and musicology it has yet to be studied in any comprehensive or systematic way by those working in the visual arts *Queer ing Russian Art Realism Revolution Performance* is meant to address this lacuna by providing a platform for new scholarship that connects Russian art with queerness in a variety of ways Situated at the intersection of Visual Studies and Queer Studies and working from different theoretical and disciplinary perspectives the contributors expose and explore the queer imagery and sensibilities in works of visual art produced in pre Soviet Soviet and post Soviet contexts and beneath the surface of conventional histories of Russian and Soviet art **Bulletin of Cultural Life in the U.S.S.R.**, 1927

*Hannes Meyer* Tatiana Efrussi, 2025-02-21 Swiss architect and urban planner the second director of the Bauhaus Dessau Hannes Meyer spent about six years in the USSR from 1930 to 1936 This book presents the first in depth study of Hannes Meyer's activities during the years of early Stalinism There is a global interest in this architect's legacy today but his work can hardly be understood without a closer examination of the key chapter in his career This book is an attempt to challenge the usual Western centered perspective and explore not only what Meyer could bring to the Soviet Union but also what he sought to learn there and how this interaction influenced his work and thinking The somewhat provocative title underscores this thesis A detailed reconstruction of his professional activities during this period was made possible through archival research in several countries Russia Germany Austria and Switzerland and field trips across Russia In the end the narrative offers a glimpse into the Soviet architectural context of the 1930s networks hierarchies behavioral strategies theories and interpretations of major polemical concepts such as proletarian architecture and socialist realism Among the projects for socialist cities Meyer was commissioned to create the urban plan for the capital of the Jewish Autonomous Region in the USSR Birobidzhan The dedicated book chapter explores his involvement in the search for a distinct Soviet Jewish style Hannes Meyer the most controversial of the architects associated with the Bauhaus was passionately involved in politics and available documents indicate his desire to become a Soviet architect at all costs The research allows us to view Meyer not only as a victim but also as an actor in the early Stalinist system based on violence *Artbibliographies Modern*, 1988 Abstracts of journal articles books essays exhibition catalogs dissertations and exhibition reviews The scope of ARTbibliographies Modern extends from artists and movements beginning with Impressionism in the late 19th century up to the most recent works and trends in the late 20th century Photography is covered from its invention in 1839 to the present A particular emphasis is placed upon adding new and lesser known artists and on the coverage of foreign language literature Approximately 13 000 new entries are added each year Published with title LOMA from 1969 1971
