Contemporary Studies In Human Ecology:

Human Ecology Daniel G. Bates, Judith Tucker, 2010-03-29 This book arose from the need to develop accessible research based case study material which addresses contemporary issues and problems in the rapidly evolving field of human ecology Academic political and indeed public interest in the environmental sciences is on the rise This is no doubt spurred by media coverage of climate change and global warming and attendant natural disasters such as unusual drought and flood conditions toxic dust storms pollution of air and water and the like But there is also a growing intellectual awareness of the social causes of anthropogenic environmental impacts political vectors in determining conservation outcomes and the role of local representations of ecological knowledge in resource management and sustainable yield production This is reflected in the rapid increase of ecology courses being taught at leading universities in the fast growing developing countries much as was the case a decade or two ago in Europe and North America The research presented here is all taken from recent issues of Human Ecology An Interdisciplinary Journal Since the journal itself is a leading forum for contemporary research the articles we have selected represent a cross section of work which brings the perspectives of human ecology to bear on current problems being faced around the world The chapters are organized in such a way to facilitate the use of this volume either to teach a course or to introduce an informed reader to the field

Contemporary Studies in Human Ecology S. L. Malik, 1998-01-01 Ecological problems require to be handled with an integrated approach for they are intimately connected to the biological endowments as well as to social and cultural characteristics Adaptation and resource management for instance are both biological and cultural issues The present volume shows the direction to integrated research on environmental topics The volume shows the importance of participation in tribal and peasant development macro and micro environmental designs and eco friendly development This volume will be of great use as a reference book to students and research workers in this field of Environmental Studies Life Sciences and Social Sciences

Case Studies in Human Ecology Daniel G. Bates, Sarah H. Lees, 2013-06-29 This volume was developed to meet a much noted need for accessible case study material for courses in human ecology cultural ecology cultural geography and other subjects increasingly offered to fulfill renewed student and faculty interest in environmental issues The case studies all taken from the journal Human Ecology An Interdisciplinary Journal represent a broad cross section of contemporary research It is tempting but inaccurate to suggest that these represent the Best of Human Ecology They were selected from among many outstanding possibilities because they worked well with the organization of the book which in turn reflects the way in which courses in human ecology are often organized This book provides a useful sample of case studies in the application of the perspective of human ecology to a wide variety of problems in different regions of the world University courses in human ecology typically begin with basic concepts pertaining to energy flow feeding relations material cycles population dynamics and ecosystem properties and then take up illustrative case studies of human environmental interactions These are usually discussed either along the lines of distinctive

Asian Studies ,2001 **Journal of Social Sciences** ,2007 **The Botanica** ,1999 Managing the Commons John A. Baden, Douglas S. Noonan, 2017-08-15 Managing natural resources that are held in common is a great and grave challenge It requires addressing the community of users beneficiaries and managers It also requires consideration of how those communities interact with the commons itself At stake is the prosperity and even survival of both the people and the environment Understanding and improving how we relate to commons has been the focus of much scholarly and practical research in the last 30 years A quick look at the various natural resource commons surrounding us indicates that this will no doubt continue Pacific Northwest salmon fisheries represent a system of commons both complex and illustrative My past history as administrator of the US Environmental Protection Agency and my fisherman s interest in salmon has heightened my sensitivity to the plight of the salmon and the people whose lives they affect Recently my wife and I moved back to the Pacific North west something the salmon try to do every year as they live out their inspiring life cycles Unlike us the salmon do not always find a hospitable environment when they return There are many reasons Simply put there are more people in the salmon s way and they struggle more with the problems that come with expanding human populations A number of reports issued over the past few years have chronicled the broad declines and local extinction of many salmon steelhead and sea run cutthroat stocks in the region The people who fish for a living and the communities in which they live have been hit hard Our resource agencies are in danger of being overwhelmed by the complexity and magnitude of the problem Why are salmon faring so poorly Who is responsible What can be done to reverse the recent declines in salmon populations When tragedy befalls a commons as it has the salmon I come to no conclusion about who is at fault and I don t intend to The one thing that I am certain of is that the only truly innocent parties in all of this are the salmon and the generations of people yet to come It seems to me that the responsibility falls upon all of us fishermen resource managers and concerned citizens alike to take the steps necessary to ensure that salmon populations recover to the point that our children will be able to enjoy the quality of life we once took for granted While many people focus on how to get the most from commons groups like the Sustainable Fisheries Foundation emphasize providing and maintaining those natural resources Their goal is deceptively simple We are trying to put more salmon back in the rivers and lakes of the Pacific Northwest Determining exactly how to accomplish this goal has defied the efforts of a great many dedicated and talented people Many papers and panel discussions

especially reports on the status and trend of wild salmon populations in the North Pacific make it clear that many salmon stocks in parts of the lower United States southern British Columbia and the west coast of Vancouver Island are not faring well The decline in salmon numbers in these areas corresponds with a rapidly expanding human population alterations in land and water use increasing sediment and containment loads and heavy fishing pressure by a combination of sport commercial and tribal groups
