Interpersonal Communication Pamela J. Kalbfleisch, 2013-09-13 Interpersonal relationships are the core of our societal system and have been since before the dawn of civilization In today's world friends lovers companions and confidants make valuable contributions to our everyday lives These are the relationships whose members are not automatically participants as a result of their birth and kin affiliations The focus is on these relationships that must be forged from the sometimes indifferent and sometimes hostile world Yet there is still much that is not known about how these relationships evolve how partners communicate in on going relationships how people keep their relationships together and how they cope when they fall apart Primary to the focus of this book is the underlying theme of evolving interpersonal relationships from the initial encounter to the mature alliance The contributors to this volume provide a contemporary perspective for the study of interpersonal relationships Fresh areas of scholarly inquiry are presented and existing approaches are re examined Research in the introductory chapters breaks new ground and appraises the ultimate question of what impact initial interactions have on further relational development The mid section of the volume concerns communication issues that confront the members of a relationship in process focusing on how conflict

and jealousy are communicated to a relational partner This research considers relational development as well as obstacles and barriers to evolving relationships The concluding chapters probe the question Ultimately do all good things have to come to an end Employing innovative techniques to examine maturing and disengaging relationships the research presented here focuses on how interpersonal relationships become committed and mature Varied Perspectives on Play and Learning Ole Fredrik Lillemyr, Sue Dockett, Bob Perry, 2013-09-01 This book brings together an international group of researchers reporting on their work about play and early childhood education across 13 countries Norway Sweden Denmark England Germany Hong Kong United States of America India The Maldives Sri Lanka Singapore China and Australia It contributes to growing international conversations about play and the role of play in early childhood education Each of the chapters in this anthology reflects different directions in research as well as a range of approaches to reconceptualising play Each researcher questions assumptions underpinning young children's play and early childhood education and explores the implications of these questions for further research practice and policy Chapters report a wide range of innovative and transformative research focusing on areas such as the play of infants and toddlers the role of values in play the complexity of connections between play and learning motivation the role and understandings of early childhood educators in promoting children's play risky play and the impact of Westernised approaches to play in different contexts This book argues for the importance of children's play at a time when there is a great deal of pressure to increase the academic focus of early education and to eliminate play that could be deemed risky Several authors note moves towards pedagogies of play and explore the potential links between play and learning in early education settings The research reported in this book is a timely reminder of the value of play for and of itself as well as the learning potential of play It provides a pathway into the debates about the role and value of play in early years education for students researchers and policy makers *The Self in Social Interaction: Classic and contemporary perspectives* Chad Gordon, Kenneth J.
