Contemporary Religion and social responsibility Norbert C. Brockman (ed),1973 **Contemporary Religion and Social Responsibility** Norbert C. Brockman,Nicholas Piediscalzi,1973 **Contemporary Religious Studies in China** Xinping Zhuo,2020-04-30 It is a spectacular history since the founding of the PRC When looking back to the history we realize the huge accomplishment of the contemporary China and the remarkable spirit of Chinese people Just as that in other branches the achievements of contemporary Chinese academic development are fully manifested in the research and results of contemporary Chinese religious studies Therefore there is special academic value and practical significance for the development and the future of our religious studies to reexamine this period of history and explore how contemporary Chinese scholars think about it During the academic development of contemporary China religious studies be come one of the most developed and popular as well as controversial subjects This is because religious studies have been situated in a complex background and it is difficult to have a well situated position with broad spectrums and sensitive questions Hence religious studies belong to the subjects that are growing The understanding of its connotation and extension is still on the way The full development of religious studies as a discipline will represent the real leap of Chinese religious studies The World Religions Speak on "The Relevance of Religion in the Modern World" Finley P. Religion, Identity and Change Simon Coleman,Peter Collins,2017-03-02 Religion is of enduring importance in the lives of many people yet the religious landscape has been dramatically transformed in recent decades Established churches have been challenged by eastern faiths revivals of Christian and Islamic fundamentalism and the eclectic spiritualities of the New Age Religion has long been regarded by social scientists and psychologists as a key source of identity formation ranging from personal conversion experiences to collective association with fellow believers This book addresses the need for a reassessment of issues relating to identity in the light of current transformations in society as a whole and religion in particular Drawing together case studies from many different expressions of faith and belief Hindu Muslim Roman Catholic Anglican New Age leading scholars ask how contemporary religions or spiritualities respond to the challenge of forming individual and collective identities in a nation context marked by secularisation and postmodern decentring of culture as well as religious revitalisation The book focuses on Britain as a context for religious change but asks important questions that are of universal significance for those studying religion How is personal and collective identity constructed in a world of multiple social and cultural influences What role can religion play in creating reinforcing or even transforming such identity

Movements and Issues in World Religions: A Sourcebook and Analysis of Developments Since 1945 Charles Wei-hsun Fu,Gerhard E. Spiegler,1987-05-14 The religious world of the past forty years has been characterized by profound

changes Western and Eastern religions both traditional and new have rapidly developed into interactive socio political forces that cannot be ignored if we are to understand contemporary social forces Until now there has been no single scholarly work that deals with virtually all of the important postwar religious movements and issues in world religions This unprecedented collection offers critical insights into diverse political religious and ideological traditions and their interaction in different regions of the world today

Christianity in the Modern World Afe Adogame, Elizabeth Olson, 2016-05-23 What is the state of Christianity today and what might it look like in the future In the West the story for a long time has revolved around decline and the loss of monopoly status but how are these shifts changing the practice of Christianity or individual belief Similarly the rapid growth of Christianities in the Global South has been well reported but the continuing complex intersections of mission Christianity with indigenous religions are less well known Large scale flows of people across increasingly fluid borders mean that not only does immigration sometimes significantly boost Christian numbers in a given country but that different forms of Christianity shift traditional religious landscapes How will emerging trends such as reverse mission from the Global South affect Christianities in areas more used to sending rather than receiving missions As the majority of believers shifts from the West to the Global South how will issues such as homosexuality be played out theologically politically and individually Will new virtual churches manage to create viable long term communities How does new festival Christianity function in the religious life of an individual The divergent and oftentimes contradictory state of Christianity in the modern world fuels questions about its place and future in the world in politics education and healthcare This book brings together cutting edge research on the most recent changes and trends in Christianity worldwide Contributors drawn from the USA UK and Europe Africa and East Asia offer an invaluable breadth of coverage expertise and disciplinary perspective at the intersections between sociology of religion theology politics education and human geography
