**Andrew Kolin**

## **Contested Terrain The Transformation Of The Workplace In America:**

Contested Terrain Richard Edwards, 1979-04-19 USA Monograph on the nature of management control over the working class through capitalist work organization illustrates with historical case studies the failure to establish workers self management and social implications of automatic control monopoly personnel management bureaucracy social conflict etc Argues that supervisory hierarchy is intrinsic to profitability economic doctrine and discusses political aspects of trade union structure and labour market segmentation Bibliography pp 244 to 252 graphs and statistical tables Contested Terrain Richard Edwards, 1979 *Contested terrain* Richard C. Edwards, 1979 **Political Economy of Labor Repression in the United States** Andrew Kolin, 2016-11-16 This book presents a detailed explanation of the essential elements that characterize capital labor relations and the resulting social conflict that leads to repression of labor It links repression to the class struggle between capital and labor The starting point involves an historical approach used to explore labor repression after the American Revolution What follows is an examination of the role of government along with the growth of American capitalism to analyze capital labor conflict Subsequent chapters trace US history during the 19th century to discuss the question of the role assumed by the inclusion exclusion of capital and labor in political economic structures which in turn lead to repression Wholesale exclusion of labor from a fundamental role in framing policy in these institutions was crucial in understanding the unfolding of labor repression Repression emerges amid a social struggle to acquire and maintain control over policy making bodies which pits the few against the many In response labor attempts to push back against institutional exclusion in part by the formation of labor unions Capital reacts to such actions using repression to prevent labor from having a greater role in social institutions For instance this is played out inside the workplace as capital and labor engage in a political struggle over the function of the workplace Given capital s monopoly of ownership capital employs various means to repress labor at work including the introduction of technology mass firings crushing strikes and the use of force to break up unions The role of the state is not to be overlooked in its support of elite control over production as well as aiding through legal means the growth of a capitalist economy in opposition to labor s conception of greater economic democracy This book explains how and why labor continues to confront repression in the 20th and 21st centuries Managing the Human Factor Bruce E. Kaufman, 2019-06-30 Human resource departments are key components in the people management system of nearly every medium to large organization in the industrial world They provide a wide range of essential services relating to employees including recruitment compensation benefits training and labor relations A century ago however before the concept of human resource management had been invented the supervision and care of employees at even the largest companies were conducted without written policies or formal planning and often in harsh arbitrary and counterproductive ways How did companies such as United States Steel manage a workforce of 160 000 employees at dozens of plants without a specialized personnel or industrial relations department What led some of these organizations to introduce human

resources practices at the end of the nineteenth century How were the earliest personnel departments structured and what were their responsibilities And how did the theory and implementation of human resources management evolve both within industry and as an academic field of research and teaching In *Managing the Human Factor* Bruce E Kaufman chronicles the origins and early development of human resource management HRM in the United States from the 1870s when the Labor Problem emerged as the nation's primary domestic policy concern to 1933 and the start of the New Deal Through new archival research an extensive review and synthesis of the historical and contemporary literatures and case studies illustrating best and worst practices during this period Kaufman identifies the fourteen ideas events and movements that led to the creation of specialized HRM departments in the late 1910s as well as their further growth and development into strategic business units in the welfare capitalism period of the 1920s The research presented in this book not only uncovers many new aspects of the early development of personnel and industrial relations but also challenges central parts of the contemporary interpretation of the concept and evolution of HRM Rich with insights on both the present and past of human resource management *Managing the Human Factor* will be widely regarded as the definitive account of the early history of employee management in American companies and a must read for all those interested in the indispensable function of managing people in organizations

*Working in America* Amy S. Wharton, 2002 Drawing from a wide range of classic writings and contemporary empirical selections Wharton examines important topics in the field and exposes students to examples of sociological research and different theoretical approaches to studying the world of work

**Class Struggle and the New Deal** Rhonda F. Levine, 1988 In this reassessment of New Deal policymaking Rhonda Levine argues that the major constraints upon and catalysts for FDR's policies were rooted in class conflict Countering neo Marxist and state centred theories which focus on administrative and bureaucratic structures she contends that too little attention has been paid to the effect of class struggle

Improving Poor People Michael B. Katz, 1997-04-02 There are places where history feels irrelevant and America's inner cities are among them acknowledges Michael Katz in expressing the tensions between activism and scholarship But this major historian of urban poverty realizes that the pain in these cities has its origins in the American past To understand contemporary poverty he looks particularly at an old attitude because many nineteenth century reformers traced extreme poverty to drink laziness and other forms of bad behavior they tried to use public policy and philanthropy to improve the character of poor people rather than to attack the structural causes of their misery Showing how this misdiagnosis has afflicted today's welfare and educational systems Katz draws on his own experiences to introduce each of four topics the welfare state the underclass debate urban school reform and the strategies of survival used by the urban poor Uniquely informed by his personal involvement each chapter also illustrates the interpretive power of history by focusing on a strand of social policy in the nineteenth and twentieth centuries social welfare from the poorhouse era through the New Deal ideas about urban poverty from the undeserving poor to the underclass and the emergence of public education

through the radical school reform movement now at work in Chicago Why have American governments proved unable to redesign a welfare system that will satisfy anyone Why has public policy proved unable to eradicate poverty and prevent the deterioration of major cities What strategies have helped poor people survive the poverty endemic to urban history How did urban schools become unresponsive bureaucracies that fail to educate most of their students Are there fresh constructive ways to think about welfare poverty and public education Throughout the book Katz shows how interpretations of the past grounded in analytic history can free us of comforting myths and help us to reframe discussions of these great public issues

*Mechanics of the Middle Class* Robert Zussman, 2024-03-29 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985 **Restructuring The**

**Welfare State** B. Rothstein, S. Steinmo, 2016-04-30 The modern welfare state is under threat from a variety of fronts Changing demographic patterns declining public trust interest group demands and growing international competition for capital and labour are presenting modern states with intense pressures This volume examines these competing pressures and offers a coherent analyses of both institutional resilience and institutional change Adopting an evolutionary approach this innovative volume demonstrates both how past practices and policies significantly affect the current options and how social and economic forces impinge upon each of these societies in surprisingly different ways Cross national in scope and unified in approach Restructuring the Welfare State examines core issues facing the contemporary welfare state while at the same time significantly advancing historical institutionalist theory **The McDonaldization of Society** George Ritzer, 2013

George Ritzer's McDonaldization of Society now celebrating its 20th anniversary continues to stand as one of the pillars of modern day sociological thought By linking theory to 21st century culture this book resonates with students in a way that few other books do opening their eyes to many current issues especially in consumption and globalization As in previous editions the book has been updated and it offers new discussions of among others In N Out Burger and Pret A Manger as possible antitheses of McDonaldization The biggest change however is that the book has been radically streamlined to offer an even clearer articulation of the now famous McDonaldization thesis CONTESTED TERRAIN : THE TRANSFORMATION OF

THE WORKPLACE IN THE 20. CENTURY. Richard Edwards, 1979 **Deindustrialization and the Restructuring of**

**American Industry** Michael Wallace, Joyce Rothschild, 1988 *The American Economic Review*, 1985 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association **North American Cities in the Victorian Age** David Ward, John P. Radford, 1983

**Critical Social Issues in American Education** H. Svi Shapiro, David E. Purpel, 1993 The Origins of Internal Labor  
Market in American Manufacturing Firms, 1910-1940 Sanford M. Jacoby, 1981 Working-class America Michael H.

Frisch, Daniel J. Walkowitz, 1983

**"Time and a Half's the American Way"** Marc Linder, 2004
