*Contested Cities in the Modern World* A. C. Hepburn, 2004-06-19 Cities are close knit communities When rival ethnic groups develop which refuse to concede predominance deep conflicts may occur Some have been managed peacefully as in Brussels and Montreal Other cases such as Danzig Gdansk and Trieste have more or less forcefully been resolved in favour of one of the parties In further cases such as Belfast and Jerusalem protracted violence has not delivered a solution *Contested Cities in the Modern West* examines the roles of international interventions state policies and social processes in influencing such situations with particular reference to the above cases *Bordered Cities and Divided Societies* Scott A.

Bollens, 2021-03-18 *Bordered Cities and Divided Societies* is a provocative moving and poetic encounter with the hearts and minds of individuals living in nine cities of conflict violence and healing Jerusalem Belfast Johannesburg Nicosia Sarajevo Mostar Barcelona Bilbao and Beirut Based on research spanning 25 years including 360 interviews and over two and a half years of in country field research this innovative work employs a series of concise reflective narrative essays grouped into four thematic sections to provide a humanistic on the ground understanding of divided cities conflict and peacemaking Incorporating both scholarly analyses based on empirical research and introspective essays Bollens digs underneath grand narratives of conflict to illuminate the complexities and paradoxes of living amid nationalistic political strife and the challenges of planning and policymaking in divided societies Richly illustrated the book includes informative synopses about the cities that provide access for general readers while extensive connections to recent literature enhance the book s research value to scholars **Cities, Change, and Conflict** Nancy Kleniewski, Alexander R. **Architecture, Space and Memory of Resurrection in Northern Ireland** Mohamed Gamal Abdelmonem, Gehan Selim, 2019-04-25 Northern Ireland has a complex urbanism with multilayered socio spatial politics. In this environment issues of communication, self representation and expression of identity are central to the experience of urban space and architecture where the dichotomy of division and shared living are spatially exercised in everyday life. Unlike other studies in the area, this book focuses on the everyday experiences of local communities in both public and private spheres, issues of shareness, challenging conventional approaches to divided cities. The book aims to layer its narratives of architectural and social developments as an urban experience in post conflict settings over the past two decades. *Transgressive Design Strategies for Utopian Cities* Bertug Ozariso, Hasim Altan, 2023-03-24 This book critically examines the philosophy of the term transgression and how it shapes the utopian vision of contemporary urban design scenarios. The aim of this book is to provide scholarly yet accessible graphic novel illustrations to inform narratives of urban manifestos. Through four select case studies from the UK, Cyprus and Germany, the book highlights the paradoxes and contradictions in architecture and provides detailed evaluation of the limits and contemporary forms of sustainable urban regeneration. The book proposes an utopian urban vision approach to social, political and cultural relations, trends and tensions both locally and globally and seeks to inspire an awakening in architectural discourse. The book argues that the philosophical undermining of transgression is the result of a phenomenon from a different perspective, its philosophical background, social construction, experimental research process and design implications on the city. As such, the book provides a critical examination of how architectural design interventions contribute to sustainable urban regeneration and gentrification and can impact local communities. This book provides a significant contribution to both undergraduate and postgraduate students as well as early career researchers working in architecture, planning and sustainable urban design. It offers effective guidance on adopting the state of the art graphical illustrations into their own design projects while considering contradictions between architectural discourse and the philosophy of transgression. *The Fate of Cities* Roger Biles, 2011 The first major comprehensive treatment of urban

revitalization in 35 years Examines the federal government's relationship with urban America from the Truman through the Clinton administrations Provides a telling critique of how in the long run government turned a blind eye to the fate of cities

**The Sanitary City** Martin V. Melosi, 2008-04-27 Immersed in their on demand highly consumptive and disposable lifestyles most urban Americans take for granted the technologies that provide them with potable water remove their trash and process their wastewater These vital services however are the byproduct of many decades of development by engineers sanitarians and civic planners In *The Sanitary City* Martin V Melosi assembles a comprehensive thoroughly researched and referenced history of sanitary services in urban America He examines the evolution of water supply sewage systems and solid waste disposal during three distinct eras The Age of Miasmas pre 1880 The Bacteriological Revolution 1880 1945 and The New Ecology 1945 to present day Originally published in 2000 this abridged edition includes updated text and bibliographic materials *The Sanitary City* is an essential resource for those interested in environmental history environmental engineering science and technology urban studies and public health

Reznicek, 2017 Building on the long standing image of Paris as the Capital of the Nineteenth Century and the Capital of Modernity this book examines the city's place in the imagination of Irish women writers in the long nineteenth century *Illustrated Phonographic World*, 1922

Urban America in the Modern Age Carl Abbott, 2007 Since the appearance of *Urban America in the Modern Age* in 1987 the study of American cities has flourished In this long awaited second edition Carl Abbott draws on the recent works of historians who have explored issues of urban growth municipal politics immigration and ethnicity suburbanization and environmental change The fascination with growth and change in the nation's metropolitan areas spans a wide range of scholarly fields and the new edition also benefits from scholarship in disciplines closely related to urban history including geography political science sociology and urban planning Featuring an entirely new chapter covering the years since 1980 and a bank of interesting photographs the second edition of *Urban America in the Modern Age* further explores and fine tunes the themes and topics central to its predecessor the physical form of metropolitan areas their sources of growth and mix of ethnic and racial groups the shaping of and responses to public policy and ideas of community planning Regionally balanced with examples from New York Boston and Chicago as well as Los Angeles Atlanta San Francisco Seattle Denver San Antonio Miami Charlotte Washington Detroit and Cleveland the second edition of *Urban America in the Modern Age* makes ideal supplementary reading for courses in Urban History twentieth century America as well as the second half of the US survey

*City Schools and City Politics* John Portz, Lana Stein, Robin R. Jones, 1999 An explanation of why some US cities are better at educational reform than others It relates education to politics showing how the whole village can be mobilized to better educate tomorrow's citizens It is based on an 11 city study of civic capacity and urban education

A City Transformed David Schuyler, 2002 As was true of many American cities Lancaster Pennsylvania adopted urban renewal programs in the postwar years to revitalize a downtown that was experiencing economic decline As the commercial and

residential infrastructure of the city decayed people and jobs migrated to the suburbs Urban renewal was supposed to make the downtown viable again as a site for both businesses and residences But as David Schuyler shows in *A City Transformed* redevelopment in Lancaster resulted in more failures than successes Beginning in the 1950s the Lancaster Redevelopment Authority implemented a comprehensive revitalization program that changed the physical shape of the city In attempting to solidify the retail functions of the traditional central business district redevelopment dramatically altered key blocks of the downtown replacing handsome turn of the century Beaux Arts structures with modernist concrete boxes and a sterile public square The strategy for eliminating density and blighted buildings resulted in the demolition of whole blocks of dwellings and perhaps more importantly destabilized Lancaster's African American community *A City Transformed* is a compelling examination of a northern city struggling with its history and the legacy of segregation But the redevelopment projects undertaken by the city however ambitious could not overcome the suburban growth that continues to sprawl over the countryside or the patterns of residential segregation that define city and suburb When the Redevelopment Authority ceased operating in 1980 its legacy was a city with a declining economy high levels of poverty and joblessness and an increasing concentration of racial and ethnic minorities a city very much at risk In important ways what happened in Lancaster was the product of federal policies and national trends As Schuyler observes Lancaster's experience is the nation's drama played on a local stage

**The Contested Metropolis** Raffaele Paloscia, 2004 Inspiring provocative and encouraging alternatives to the crises which are overtaking our cities Berlin Brussels Florence London Paris Toronto Zurich fascinating western metropolises which are all sophisticated icons of international commerce finance tourism though in very different ways Striking appearances and successful structures are however only one side of the reality On the shadow side there are the insidious changes which have come about primarily for reasons of quick profit and consumerism social and ethnic ghettos are on the increase Yet in all these cities there are forces which are facing up to these supposedly irreversible developments and which must be taken seriously INURA an International Network for Urban Research and Action published *Possible Urban Worlds* in 1998 to draw attention to contemporary urban renewal Now they are publishing *Contested Metropolis* which looks at these seven cities presenting the most important critics and alternative urban projects

*Essays on Sunbelt Cities and Recent Urban America* Raymond A. Mohl, 1990 For centuries scholars have scrutinized the cities of the Old World poking into ruins and libraries for unwritten and written clues to origins and demise The American cities that have played major roles in the history of the United States have also had their share of study But only recently have historians applied systematic analysis to what is now called the Sunbelt where half the nation's ten largest cities are located cities that have grown astronomically since World War II This volume brings together the important findings of leading urban historians Addressing a variety of topics such as the reasons behind the Sunbelt's boom their essays place the sunbelt phenomenon within the larger context of urban development nationwide Kenneth T Jackson begins the introduction by pointing out the problem of defining the

Sunbelt and the reasons for urban growth in the sunbelt areas during the post World War II era Essays by Robert Fisher Roger W Lotchin and Robert B Fairbanks focus on specific cities and leadership issues on the attitudes that shaped Houston on the military's role in the urban development of San Diego and on the politics of governing Dallas from 1930 to 1960 An essay by Carl Abbott looks at the distinctive physical characteristics of cities in the Southwest Raymond A Mohl's essay on the transformation of urban America since 1945 and Zane L Miller's essay on Walter Prescott Webb and cultural regionalism provide broader contexts in which to view and understand urban sunbelt development The essays of this volume reflect the individual authors' different methodologies and approaches Taken together they highlight the belief that national development and twentieth century urban trends were as important in shaping sunbelt cities as was the regional culture
