Contesting Space Power Relationships And The Urban Built Environment In Colonial Spingapore:

Contesting Space in Colonial Singapore Brenda S. A. Yeoh, 2003 In the British colonial city of Singapore municipal authorities and Asian communities faced off over numerous issues As the city expanded various disputes concerning issues such as sanitation housing and street names arose This volume details these conflicts and how they shaped the city

Contesting Space Brenda S. A. Yeoh, 1996 This book examines the nature of conflict between the colonial authorities which wanted the city ordered sanitized and amenable to regulation and the Asian communities who lived and worked in colonial Singapore and had their own values priorities and resources The result was an environment that embodied and expressed the tensions and negotiations conflicts and compromises between the different groups *A Guide to Spatial History* Konrad Lawson, Riccardo Bavaj, Bernhard Struck, 2022-01-07 This guide provides an overview of the thematic areas analytical aspects and avenues of research which together form a broader conversation around doing spatial history Spatial history is not a field with clearly delineated boundaries For the most part it lacks a distinct unambiguous scholarly identity It can only be thought of in relation to other typically more established fields Indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields Consequently it must be discussed in relation to a variety of historiographical contexts Each of these have their own intellectual genealogies institutional settings and conceptual path dependencies With this in mind this guide surveys the following areas territoriality infrastructure and borders nature environment and landscape city and home social space and political protest spaces of knowledge spatial imaginaries cartographic representations and historical GIS research *Architecture and Urban Form in Kuala Lumpur* Yat Ming Loo, 2016-04-08 Kuala Lumpur the capital city of Malaysia is a former colony of the British Empire which today prides itself in being a multicultural society par excellence However the Islamisation of the urban landscape which is at the core of Malaysia's decolonisation projects has marginalised the Chinese urban spaces which were once at the heart of Kuala Lumpur Engaging with complex colonial and postcolonial aspects of the city from the British colonial era in the 1880s to the modernisation period in the 1990s this book demonstrates how Kuala Lumpur's urban landscape is overwritten by a racial agenda through the promotion of Malaysian Architecture including the world famous mega projects of the Petronas Twin Towers and the new administrative capital of Putrajaya Drawing on a wide range of Chinese community archives interviews and resources the book illustrates how Kuala Lumpur's Chinese spaces have been subjugated This includes original case studies showing how the Chinese re appropriated the Kuala Lumpur old city centre of Chinatown and Chinese cemeteries as a way of contesting state's hegemonic national identity and ideology This book is arguably the first academic book to examine the relationship of Malaysia's large Chinese minority with the politics of architecture and urbanism in Kuala Lumpur It is also one of the few academic books to situate the Chinese diaspora spaces at the centre of the construction of city and nation By including the spatial contestation of those from the margins and their resistance against the state ideology this book

proposes a recuperative urban and architectural history seeking to revalidate the marginalised spaces of minority community and re script them into the narrative of the postcolonial nation state *Trans-Colonial Urban Space in Palestine* Maha Samman, 2013-06-26 Taking a multidisciplinary approach to examine the dynamics of ethno national contestation and colonialism in Israel Palestine this book investigates the approaches for dealing with the colonial and post colonial urban space resituating them within the various theoretical frameworks in colonial urban studies The book uses Henry Lefebvre's three constituents of space perceived conceived and lived to analyse past and present colonial cases interactively with time It mixes the non temporal conceptual framework of analysis of colonialism using literature of previous colonial cases with the inter temporal abstract Lefebvrian concepts of space to produce an inter temporal re reading of them Israeli colonialism in the occupied areas of 1967 its contractions from Sinai and Gaza and the implications on the West Bank are analysed in detail By illustrating the transformations in colonial urban space at different temporal stages a new phase is proposed the trans colonial This provides a conceptual means to avoid the pitfalls of neo colonial and post colonial influences experienced in previous cases and the book goes on to highlight the implications of such a phase on the Palestinians It is an important contribution to studies on Middle East Politics and Urban Geography *Theorizing The Southeast Asian City As Text: Urban Landscapes, Cultural Documents, And Interpretative Experiences* Robbie B H Goh, Brenda S A Yeoh, 2003-05-20 Theorizing the Southeast Asian City as Text examines the ways in which culture ethnicity languages traditions governance policies and histories interplay in the creation of the urban experiences in contemporary Southeast Asian cities It focuses on the ways in which urban spatial forms are textual experiences subject to interpretative strategies and the influence of other discourses In addition it also analyzes the experiences of modernization in such cities but also in terms of the strategies of containment refurbishment and loss which this has occasioned **Southeast Asian Journal of Social Science**, 1997 **Negotiating Urban Conflicts** Helmuth Berking, 2006 Cities have always been arenas of social and symbolic conflict As places of encounter between different classes ethnic groups and lifestyles cities play the role of powerful integrators yet on the other hand urban contexts are the ideal setting for marginalization and violence The struggle over control of urban spaces is an ambivalent mode of sociation while producing themselves groups produce exclusive spaces and then in turn use the boundaries they have created to define themselves This volume presents major urban conflicts and analyzes modes of negotiation against the theoretical background of postcolonialism *Of Gods, Gifts and Ghosts* Terence Heng, 2020-12-02 How do individuals inscribe their spiritual identities and diasporic ethnicities in the city Through a series of sociological and photographic essays Terence Heng maps the various rituals collectives individuals and events that characterise Chinese religion practices in Singapore From spirit mediums to the Hungry Ghost Festival each chapter engages with the social the spatial and the ephemeral and in so doing it will explore the significance and relevance of Chinese religion in a secular nation state reveal the strategies and tactics used by diasporic individuals to perform and retain their identities uncover the

importance of flow and fluidity in the making of sacred space and evidence the value and efficacy of the use of photographs in social research *Of Gods Gifts and Ghosts* is a ground breaking exploration into the intersections between visual sociology cultural geography and creative photographic practice A visual monograph that gives equal importance to image and text it interrogates the tensions between sacred and profane official and unofficial state and individual physical and spiritual peeling away the myriad layers of the spiritual imagination **Changing Landscapes of Singapore** Peggy Teo,2004
