Continental Philosophy Of Science:

Continental Philosophy of Science Gary Gutting, 2008-04-15 Continental Philosophy of Science provides an expert guide to the major twentieth century French and German philosophical thinking on science. A comprehensive introduction by the editor provides a unified interpretative survey of continental work on philosophy of science. Interpretative essays are complemented by key primary source selections. Includes previously untranslated texts by Bergson, Bachelard, and Canguilhem and new translations of texts by Hegel and Cassirer. Contributors include Terry Pinkard, Jean Gayon, Richard Tieszen, Michael Friedman, Joseph Rouse, Mary Tiles, Hans J. Rheinberger, Linda Alcoff, Todd May, Axel Honneth, and Penelope Deutscher.

Continental Philosophy of Technoscience Hub Zwart, 2021-11-18 The key objective of this volume is to allow philosophy students and early stage researchers to become practicing philosophers in technoscientific settings. Zwart focuses on the methodological issue of how to practice continental philosophy of technoscience today. This text draws upon continental authors such as Hegel, Engels, Heidegger, Bachelard, and Lacan and their fields of dialectics, phenomenology, and psychoanalysis in developing a coherent message around the technicity of science or rather technoscience. Within technoscience, the focus will be on recent developments in life sciences research such as genomics, post-genomics, synthetic biology, and global ecology. This book uniquely presents continental perspectives that tend to be underrepresented in mainstream philosophy of science yet entail crucial insights for coming to terms with technoscience as it is evolving on a global scale today. This is an open access book.

Canguilhem and Continental Philosophy of Biology Giuseppe Bianco, Charles T. Wolfe, Gertrudis Van de Vijver, 2023-02-01 This edited volume presents papers on this alternative philosophy of biology that could be called continental philosophy of biology and the variety of positions and solutions that it has spawned. In doing so, it contributes to debates in the history and philosophy of science and the history of philosophy of science as well as to the craving for history and/or theory in the theoretical biological disciplines. In addition, however, it also provides inspiration for a broader image of philosophy of biology in which these traditional issues may have a place. The volume devotes specific attention to the work of Georges Canguilhem, which is central to this alternative tradition of continental philosophy of biology. This is the first collection on Georges Canguilhem and the Continental tradition in philosophy of biology. The book should be of interest to philosophers of biology, continental philosophers, historians of biology, and those interested in broader traditions in philosophy of science.

Continental Philosophy of Social Science Yvonne Sherratt, 2014-05-14 Contrasts the continental approach to social science with the Anglo-American tradition.

Continental Philosophy in the 20th Century Richard Kearney, 2003 Continental philosophy is one of the 20th century's most important challenging philosophical movements.

Mention in the category of multi volume reference work in the 2010 American Publishers Awards for Professional and Scholarly Excellence This outstanding eight volume work opens up new vistas and possibilities by bringing canonical figures the necessary supporting cast and marginal voices often given short shrift in less comprehensive histories into sharp focus This history recounts Continental philosophy s liberating role in philosophical thought and will deepen readers understanding whether they be advanced undergraduates or seasoned scholars Essential Choice A superb and absolutely unique project that will be an invaluable resource for students and teachers of continental philosophy The academic rigor and quality of the project is truly exemplary and is unlike anything currently on the market It will be a landmark publication that will provide the first comprehensive history of continental philosophy in the English language probably the first in any language Michael Naas DePaul University Chicago Beginning with Kant and the earliest responses to his critical philosophy and ending with the latest developments in continental thinking across a range of disciplines these volumes present the first coherent and comprehensive history of the continental tradition of philosophy The essays all newly commissioned cover not only all the major philosophers and schools but also relevant thinkers and movements outside philosophy Together these volumes offer a unique resource for understanding the complex and interconnected history of continental philosophy **Heidegger's**

Philosophy of Science Trish Glazebrook,2000 Glazebrook demonstrates that Heidegger s philosophy of science is not neatly divided into early and late or Heidegger I and Heidegger II but is rather an ongoing development over at least three periods bound together as an analysis of modern science and an uncovering of other possibilities for understanding nature Book Jacket **Continental Philosophy and the Sciences** ,2005 *Continental Philosophy and the Sciences* ,2005

Philosophical engagement with the natural and exact sciences is often thought to be the exclusive prerogative of so called analytic philosophy However the principal philosophers of the post kantian German and French traditions from which contemporary continental philosophy draws its inspiration made reflection upon the sciences an integral part of their philosophical endeavours This special issue explore this hitherto neglected side of the continental tradition and lay down a challenge to contemporary continental philosophers to reappropriate this exceptionally rich philosophical and scientific legacy BACK COVER *The History of Continental Philosophy* Keith Ansell-Pearson,Alan D.
