Contingent Creatures A Reward Event Theory Of Motivation:

Contingent Creatures Carolyn R. Morillo,1995 What motivates behavior What are the qualities of experience which make life worth living Taking a new interdisciplinary approach Morillo advances the theory that pleasure interpreted as a distinct separable noncognitive quality of experience is essential for all positive motivation and is the only intrinsic nonmoral good in the lives of human beings and many other sentient creatures Morillo supports her arguments with recent neuropsychological evidence concerning the role of reward centers in the brain and philosophical arguments for a naturalistic theory of value and the good life *Contingent Creatures* will interest philosophers psychologists and neurobiologists **Evolutionary**

Psychology and the Propositional-attitudes Alex Walter,2012-02-16 The two essays provide a critical examination of theory and research in the field of evolutionary psychology The view advanced here is that philosophical materialism and minimalist assumptions about adaptation serve Darwinian psychology better than the more popular alternative view that relies on cognitive dualism and propositional attitude psychology to formulate evolutionary psychology theory A commitment to cognitive dualism is destined to undermine the physical basis of behavior upon which evolutionary theory depends Many evolutionary psychologists do not see this but are seduced by the easy way in which hypotheses can be formulated using the propositional attitude model The challenge is to develop a materialistic and mechanistic approach to understanding human cognition and behavior including linguistic and social behavior **Darwinian Hedonism and the Epidemic of Unhealthy Behavior**

David M. Williams,2019-03-21 Provides a new approach to psychological hedonism and applies it to the growing global epidemic of unhealthy behavior [Affective Determinants of Health Behavior](#) David Michael Williams,Ryan E.

Rhodes,Mark T. Conner,2018 In the last 20 30 years research on affective determinants of health behavior has proliferated *Affective Determinants of Health Behavior* brings together this burgeoning area of research into a single volume and features contributions from leading experts in their respective areas Editors David M Williams Ryan E Rhodes and Mark T Conner and their contributing authors focus on a fascinating range of affective concepts including but not limited to hedonic response incidental affect perceived satisfaction anticipated affect affective attitudes and affective associations In the first part of the book the role of affective concepts in multiple theories of health behavior is highlighted and expanded including theories of action control dual processing temporal self regulation self determination and planned behavior along with a new theory of hedonic motivation The second part of the book focuses on the role of affective concepts in specific health behavior domains including physical activity eating smoking substance use sex tanning blood donation the performance of health professionals cancer screenings and cancer control *Affective Determinants of Health Behavior* offers readers an important window into existing research and serves as a showcase for important insights on possible new directions and implications for intervention

Wanted, More than Human Intellectual Property Johanna Gibson,2024-12-27 This book analyses animal creativity in order to unsettle the dominant assumptions that underpin current ideas of authorship and ownership in

intellectual property Drawing upon theories of animal behaviour and cognitive ethology the book exposes and disrupts the anthropocentrism that informs prevailing assumptions about creativity intentionality and authorship within the field of intellectual property towards a new theory of authorship and personhood through play and the playful Moving on to challenge the invocation of a more general human nonhuman distinction in this context the book also engages the challenge to this distinction posed by artificial intelligence Incorporating critical animal studies behavioural science ethology critical legal studies and legal philosophy the book presents a new idea of creativity which undermines the kind of rivalrous models now common in the field of intellectual property This book will be of considerable interest to those studying and teaching in the area of intellectual property as well as in animal law It will also appeal to legal theorists and others working in the social sciences in the areas of posthumanism and animal studies The Philosophical Review ,1996 **Choice** ,1995 **The Journal of Philosophy** ,1990 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933 The British National Bibliography Arthur James Wells,1996 International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences ,1997 *Theory of Motivation* Robert C. Bolles,1975 Bibliographic Guide to Psychology New York Public Library. Research Libraries,1995

Behavioral Economics James W. Allison,1983 **Forthcoming Books** Rose Arny,1996-06 *Books In Print* 2004-2005 Ed Bowker Staff,Staff Bowker, Ed,2004 **Subject Guide to Books in Print** ,1991 Intrinsic motivations and open-ended development in animals, humans, and robots Gianluca Baldassarre,Tom Stafford, Marco Mirolli,Peter Redgrave,Richard Michael Ryan,Andrew Barto,2015-02-10 The aim of this Research Topic for Frontiers in Psychology under the section of Cognitive Science and Frontiers in Neurorobotics is to present state of the art research whether theoretical empirical or computational investigations on open ended development driven by intrinsic motivations The topic will address questions such as How do motivations drive learning How are complex skills built up from a foundation of simpler competencies What are the neural and computational bases for intrinsically motivated learning What is the contribution of intrinsic motivations to wider cognition Autonomous development and lifelong open ended learning are hallmarks of intelligence Higher mammals and especially humans engage in activities that do not appear to directly serve the goals of survival reproduction or material advantage Rather a large part of their activity is intrinsically motivated behavior driven by curiosity play interest in novel stimuli and surprising events autonomous goal setting and the pleasure of acquiring new competencies This allows the cumulative acquisition of knowledge and skills that can later be used to accomplish fitness enhancing goals Intrinsic motivations continue during adulthood and in humans artistic creativity scientific discovery and subjective well being owe much to them The study of intrinsically motivated behavior has a long history in psychological and ethological research which is now being reinvigorated by perspectives from neuroscience artificial intelligence and computer science For example recent neuroscientific research is discovering how neuromodulators like dopamine and noradrenaline

relate not only to extrinsic rewards but also to novel and surprising events how brain areas such as the superior colliculus and the hippocampus are involved in the perception and processing of events novel stimuli and novel associations of stimuli and how violations of predictions and expectations influence learning and motivation Computational approaches are characterizing the space of possible reinforcement learning algorithms and their augmentation by intrinsic reinforcements of different kinds Research in robotics and machine learning is yielding systems with increasing autonomy and capacity for self improvement artificial systems with motivations that are similar to those of real organisms and support prolonged autonomous learning Computational research on intrinsic motivation is being complemented by and closely interacting with research that aims to build hierarchical architectures capable of acquiring storing and exploiting the knowledge and skills acquired through intrinsically motivated learning Now is an important moment in the study of intrinsically motivated open ended development requiring contributions and integration across a large number of fields within the cognitive sciences This Research Topic aims to contribute to this effort by welcoming papers carried out with ethological psychological neuroscientific and computational approaches as well as research that cuts across disciplines and approaches

Motivational Explanations of Behavior Katharine Blick Hoyenga, Kermit T. Hoyenga, 1984 **Emotion and Decision Making Explained** Edmund T. Rolls, 2014 What produces emotions Why do we have emotions How do we have emotions Why do emotional states feel like something What is the relation between emotion and reward value and subjective feelings of pleasure These are just some of the questions considered in this book written by a leading neuroscientist in this field

Animal Learning & Behavior, 1977

As recognized, adventure as skillfully as experience not quite lesson, amusement, as capably as arrangement can be gotten by just checking out a ebook **Contingent Creatures A Reward Event Theory Of Motivation** with it is not directly done, you could tolerate even more vis--vis this life, around the world.

We allow you this proper as without difficulty as simple way to acquire those all. We give Contingent Creatures A Reward Event Theory Of Motivation and numerous book collections from fictions to scientific research in any way. in the midst of them is this Contingent Creatures A Reward Event Theory Of Motivation that can be your partner.
