Continuing Education in the Health Professions Institute of Medicine, Board on Health Care Services, Committee on Planning a Continuing Health Care Professional Education Institute, 2010-03-12 Today in the United States the professional health workforce is not consistently prepared to provide high quality health care and assure patient safety even as the nation spends more per capita on health care than any other country The absence of a comprehensive and well integrated system of continuing education CE in the health professions is an important contributing factor to knowledge and performance deficiencies at the individual and system levels To be most effective health professionals at every stage of their careers must continue learning about advances in research and treatment in their fields and related fields in order to obtain and maintain up to date knowledge and skills in caring for their patients Many health professionals regularly undertake a variety of efforts to stay up to date but on a larger scale the nation s approach to CE for health professionals fails to support the professions in their efforts to achieve and maintain proficiency Redesigning Continuing Education in the Health Professions illustrates a vision for a better system through a comprehensive approach of continuing professional development and posits a framework upon which to develop a new more effective system The book also offers principles to guide the creation of a national continuing education institute **Continuing Professional Development In The Lifelong Learning Sector** Scales,

Peter, Pickering, Jo, Senior, Lynn, 2011-01-01 The book sets the context for CPD and Continuing Your Professional Development in Lifelong Learning Angela Steward, 2010-06-01 New qualifications for those teaching and training in the FE sector became effective in September 2007 The reform of initial teacher training and the professionalisation of the workforce in the sector require a commitment to engage in continuing professional development The rationale for the book is contained in the argument that improvement of quality in teaching and learning in the sector is not achieved exclusively through short term external professional development and training activities Moreover it requires ongoing workplace learning which is long term in focus and practice orientated and work based In order to improve future practice it needs to be embedded in critical reflection and evaluation of workloads The purpose of the book is to introduce the notion that there is an opportunity for every teacher to develop their role through their workloads e g workloads are a vehicle for professional development Ways to achieve this are identified by exploring the practice of experienced and successful teachers The author then goes on to offer guidelines for promoting constructive practice which is using the outcomes of reflection in the workplace to achieve

role development **Authentic Professional Learning** Ann Webster-Wright, 2010-08-05 There is considerable and growing interest in professionals learning across their working lives The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professionals or para professional workers in advanced industrial economies Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self regulated manner Of course many other kinds of employment also demand such behaviours However there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health legal and financial matters Part of this attention derives from expectations within the community that those who are granted relative autonomy and are often paid handsomely should be current and informed in their decision making Then like all other workers professionals are required to maintain their competence in the face of changing requirements for work Consequently a volume that seeks to inform how best this ongoing learning can be understood supported and assisted is most timely and welcomed This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning What is proposed here is that in contrast to programmatic approaches towards professional development the process of continuing professional learning is a personal complex and diverse process that does not lend itself to easy prescription or the realisation of others intentions *Continuing Education for the Health Professions* Joseph S.
