

The background of the book cover is a vibrant blue image of turbulent water, possibly a waterfall or rapids, with white foam and splashes. Overlaid on the right side of the water is a semi-transparent technical diagram of a curved structure, likely a turbine blade or airfoil, with a grid of points and lines. The title 'Continuum Methods of Physical Modeling' is written in large, bold, white sans-serif font across the upper half of the cover. The authors' names, 'Kolumban Hutter' and 'Klaus Jöhnk', are in a smaller white font to the left of the title.

Continuum Methods Of Physical Modeling:

Continuum Methods of Physical Modeling Kolumban Hutter, Klaus Jöhnk, 2004-01-20 The authors give an introduction into continuum thermomechanics the methods of dimensional analysis and turbulence modeling All these themes belong today to the everyday working method of not only environmental physicists but equally also those engineers who are confronted with continuous systems of solid and fluid mechanics soil mechanics and generally the mechanics and thermodynamics of heterogeneous systems Here the reader finds a rigorous mathematical presentation of the material which is also seen as the foundation for environmentally related physics like oceanography limnology glaciology climate dynamics and other topics in geophysics Even though it is hoped that the book will also be used as a source book by researchers in the broad field of continuum physics its intention is essentially to form a basis for teaching for upper level students majoring in mechanics mathematics physics and the classical engineering sciences The intention is to equip the reader with the ability to understand the complex nonlinear modeling in material behaviour and turbulence closure as well as to derive or invent his own models
