Continuum, Spring 1997 L. Lawrence, 1997-07-01 **Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2001** United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Labor, Health and Human Services, Education, and Related Agencies, 2000 **Developing and Maintaining Practical Archives** Gregory S. Hunter, 2020-04-14 Newly revised and updated to more thoroughly address our increasingly digital world including integration of digital records and audiovisual records into each chapter it remains the clearest and most comprehensive guide to the discipline *Using Functional Analysis in Archival Appraisal* Marcus C. Robyns, 2014-07-02 The identification of recorded information with continuing value that documents corporate and cultural memory is one of the archivist's primary tasks and he/she accomplishes this mission in part through the process of appraisal But does traditional archival appraisal based on the concepts of primary and evidential values effectively serve the needs of institutional archivists and records managers In an age of scarcity and the challenge of electronic records can archivists and records managers continue to rely upon a methodology essentially unchanged since the early 1950s *Using Functional Analysis in Archival Appraisal A Practical and Effective Alternative to Traditional Appraisal Methodologies* shows how archivists in other countries are already using functional analysis which offers a better more effective and imminently more practical alternative to traditional appraisal methodologies that rely upon an analysis of the records themselves From this book information professionals will learn what functional analysis is and how it is already used around the world its useful application for a variety of record types and media including print non textual electronic and born digital records how functional analysis provides an alternative to a hierarchical arrangement scheme based upon record groups sub groups and series that mimics the structure of an institution or organization a recommended process for the practical and effective implementation of functional analysis **The One, the Many, and the Trinity** Marc A. Pugliese, 2011-04-15 Process metaphysics is frequently minimized or dismissed as a result of a failure to grasp its genuine significance Developments of the last several centuries in philosophy science and physics fostered a revolution in metaphysics This book surveys the reasons for process philosophy and theology its genesis and historical development It considers Alfred Whitehead's metaphysics and Charles Hartshorne's and others treatment of process theology The One the Many and the Trinity analyzes perhaps the most ambitious and robust system of process thought developed from a Roman Catholic perspective that of Joseph A. Bracken S. J. Bracken brings together traditional Christian Trinitarian theism with process thought while integrating into a fundamentally Whiteheadian metaphysics a litany of diverse sources including Aristotelianism Thomism German Idealism Anglo American Idealism social theory existentialism postmodern thought and contemporary philosophy of science The book goes on to examine Bracken's process response to the problem of the one and many from a more traditional Catholic philosophical and theological perspective ABOUT THE AUTHOR Marc A. Pugliese is

assistant professor of theology at Brescia University PRAISE FOR THE BOOK Pugliese offers an extremely well informed careful and accurate reading of the philosophy of Joseph Bracken certainly the greatest Catholic advocate of process theology in the second half of the twentieth century With this book Pugliese has provided the most extensive reconstruction and critique of Bracken s thought yet available Philip Clayton Ingraham Professor of Theology Claremont School of Theology

Swartz, 2018-04-27 Moving beyond the content integration approach of multicultural education this text powerfully advocates for the importance of curriculum built upon authentic knowledge construction informed by the Black intellectual tradition and an African episteme By retrieving examining and reconnecting the continuity of African Diasporan heritage with school knowledge this volume aims to repair the rupture that has silenced this cultural memory in standard historiography in general and in PK 12 curriculum content and pedagogy in particular This ethically informed curriculum approach not only allows students of African ancestry to understand where they fit in the world but also makes the accomplishments and teachings of our collective ancestors available for the benefit of all King and Swartz provide readers with a process for making overt and explicit the values actions thoughts and behaviors reflected in an African episteme that serves as the foundation for African Diasporan sociohistorical phenomenon events With such knowledge teachers can conceptualize curriculum and shape instruction that locates people in all cultures as subjects with agency whose actions embody their ongoing cultural legacy *Report* ,1998 *Report - Danish Center for Applied Mathematics and Mechanics* Danish Center for Applied Mathematics and Mechanics,1998 **The Catholic Periodical and Literature Index** ,1998 **Archifacts** ,2001 **Index to Dance Periodicals 1998** Nypl Dance Collection,1999-08

Morality Politics in American Cities Elaine B. Sharp, Yvette M. Alex-Assensoh, 2005 Topless bars casino gambling needle exchange programs for drug addicts there s no question morality issues remain front and center in urban politics Presenting a systematic analysis of culture war issues at the local level Elaine Sharp shows how American cities deal with these ongoing concerns Drawing on a sample of ten strategically chosen cities she explains differences in how municipalities respond to controversies surrounding sex business abortion clinics legalized gambling gay rights and drug use By analyzing the relative importance of subculture economics and institutional arrangements in the disputes she points the way toward richer and more complete understanding of how different cities respond differently to these hot button issues Far more than a statistical study *Morality Politics in American Cities* is a collection of fascinating stories of real people grappling with down to earth issues and real life drama richly informative case studies that will captivate students and interested citizens alike Mayors public health directors activists and others speak their minds about the pros and cons of these controversies Here are

officials in one city confronting the Vatican over funding for abortion services those in another battling a local university over its refusal to provide health benefits to gay partners of faculty members and still others mounting a massive community sponsored attack on topless clubs These stories provide detailed evidence to support classifications needed for comparing cities experience with each of the five morality issues They also corroborate inferences drawn from the comparisons by showing what considerations were in play as local officials grappled with these issues Overall the study shows that cultural factors usually dominate policymaking in local politics except when specific economic interests are at stake and also observes that county level governments are more important than previously thought in terms of morality issue decisions As provocative as it is informative *Morality Politics in American Cities* demonstrates that such issues same sex marriage for example are multidimensional and often difficult to resolve Its conclusions however contingent mark an important step in the ongoing process of understanding important differences in approaches to these issues and clearly show how moral conflicts continue to define American politics
