Contracts for Infrastructure Projects Philip Loots, Donald Charrett, 2022-05-18 Contracts for Infrastructure Projects An International Guide provides a guide to the law relating to construction contracts for infrastructure projects it is intended for the use of engineers and other professionals who are involved in the negotiation and administration of construction contracts to enable them to understand the risks involved and how to minimise them The principles of construction law outlined in this book apply to small construction contracts as well as very large contracts for which the contract sum may be in the billions of dollars The focus of the book is on construction contracts entered into by commercial organisations operating in a business environment Contract law generally assumes that such parties are of equal bargaining power and puts relatively few fetters on their ability to agree on the terms of their bargain However where legislation impacts on the execution of construction projects or the operation of construction contracts it may be of major importance in protecting the rights of weaker parties or third parties It is assumed that the users of this book will be familiar with the general concepts of tendering and contracting for engineering and construction projects but may not have any formal knowledge of the law To the extent possible the emphasis is on general principles of contract law that are widely accepted in many jurisdictions Examples are drawn from case law in a number of common law jurisdictions as well as from civil codes

Construction Contracts John R. Clark, 2012-12-06 1 HISTORICAL BACKGROUND In the late 1950s many members of the design professions Engineers as well as Architects became concerned about their exposure to claims for professional malpractice and particularly about the increasing number of claims that had been successfully brought against them arising out of their Construction Phase activities This led to special studies sponsored by the American Institute of Architects and the Engineers joint Counsel The outcome was twofold the development of a policy of professional liability insurance to insure Engineers and Architects against errors and omissions in the performance of their professional services and the review and development of the customary contractual arrangements defining the design professional's undertakings vis a vis his client the Owner the Project to be designed and the Contractor who was to implement that design At the outset the AIA's Owner Architect Agreement No B131 General Conditions No A201 and the Owner Contractor Agreements Nos A101 111 were the documents most frequently used by design professionals and these received particular attention In the early 1960s it became apparent that there was a need for a separate series of documents prepared to address these relationships when the Project to be designed involved primarily engineering considerations The number of Projects for which the Engineer was employed by the Owner as the prime professional to handle the Project design and construction administration was increasing
