For the past 25 years Joe Goldbloom and I have conducted a running debate over whether specifications writers engage in the unlawful practice of law Joe's position is that lawyers have no business writing specifications that being the designer's province Having been given the honor to write this foreword I have the opportunity for the last word at least for now Joe Goldbloom and I first met in 1964 while serving together on the ASCE Committee on Contract Administration Joe became my teacher mentor and friend Underlying our good natured debate was the serious issue of the technical qualifications required of a specifications writer As a matter of fact specifications writing traditionally has fallen in a crack between the two professions Specifications writing typically is neither taught in engineering school nor in law school Engineers are taught how to design lawyers are taught how to draft contracts Specifications writing requires mastery of the technical elements of design as well as the skills of contract drafting Specifications writing is neither glamorous nor sexy it is often viewed as a necessary evil of the designer's job *Engineering Contracts and Specifications* Robert W. Law and Business of Engineering and Contracting Charles Evan Fowler, 2017-09-13. Excerpt from *Law and Business of Engineering and Contracting With Numerous Forms and Blanks for Practical Use*. It is sincerely hoped that the discussion of the relation between the engineer and contractor in Chapter I will result in many cases in a better feeling between the engineer and the contractor as they may come together on contract work. The writer has made it a lifelong study to further the good feeling that should exist between them but must confess to having made so little progress as to despair of seeing a better condition of affairs result. Yet the writer is convinced that by continually keeping at it on the part of those having this matter at heart much good will eventually come about. The subject of ordinary forms of contracts is one on which there has been much written and is a subject on which the engineer should be well posted as to fundamentals. In addition to reading the standard works on the subject of contracts it is very easy for each engineer to get together such standard forms as are valuable and file them in shape for handy reference. It is believed that the forms given herein will be found of much use to everyone as a basis for a larger collection. About the Publisher: Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com. This book is a reproduction of an important historical work. Unlike some other reproductions of classic texts, 1. We have not used OCR (Optical Character Recognition) as this leads to bad quality books with introduced typos. 2. In books where there are images such as portraits, maps, sketches, etc., we have endeavoured to keep the quality of these images so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.
