drawn little attention in Tallinn's urban developments. To envision Tallinn's urban future under placelessness, the thesis takes digital nomads as a stimulus to architecture and urbanism that integrates placelessness into local identities. It proposes design interventions on a former industrial site that accommodate an alternative urban life informed by digital nomads while encouraging placeless people to take an active part in the city's post-industrial transitions. The thesis demonstrates new spatial forms and typologies across scales that seek to inspire future urban developments in Tallinn and other cities populated with placeless people. On the other hand, while we witness placelessness through the work-from-home scenarios under the crisis of COVID-19, this thesis encourages us to look beyond the current state of emergency and reimagine placelessness in a future urban life where we reclaim our access to the public ground and personal mobility.
