Gig Economy Lucas Morgan, AI, 2025-03-03 Gig Economy offers a comprehensive guide to thriving in the rapidly expanding world of flexible work. It explores the entrepreneurial mindset necessary for success, detailing how individuals can identify lucrative opportunities and master self-management. The book highlights that the gig economy is no longer a niche but a significant part of the modern labor market. It emphasizes the importance of continuous learning and adaptable skills, providing readers with actionable insights to navigate this evolving landscape successfully. Did you know the gig economy's growth is fueled by the desire for flexible work and accessible online marketplaces? This career guide takes a practical approach, starting by defining the gig economy and its various forms. It then delves into identifying in-demand skills and platforms, teaching readers how to assess their strengths and optimize their online presence. Self-management, including time management and financial planning, is covered extensively. The book uniquely focuses on long-term career sustainability, offering a roadmap for building a fulfilling and financially secure independent career. It progresses across chapters to address challenges like maintaining motivation and planning for retirement, equipping readers with strategies for career advancement and resilience.

The AI Generation Olaf Groth, Mark Nitzberg, 2018-11-06 An update edition of Solomon's Code now. *The AI Generation* the thought-provoking examination of artificial intelligence and how it reshapes human values, trust, and power around the world. Whether in medicine, money, or love, technologies powered by forms of artificial intelligence are playing an increasingly prominent role in our lives. As we cede more decisions to thinking machines, we face new questions about staying safe, keeping a job, and having a say over the direction of our lives. The answers to those questions might depend on your race, gender, age, behavior, or nationality. New AI technologies can drive cars, treat damaged brains, and nudge workers to be more productive, but they also can threaten, manipulate, and alienate us from others. They can pit nation against nation, but they also can help the global community tackle some of its greatest challenges, from food crises to global climate change. In clear and accessible prose, global trends and strategy adviser Olaf Groth, AI scientist and social entrepreneur Mark Nitzberg, along with seasoned economics reporter Dan Zehr, provide a unique human-focused global view of humanity in a world of thinking machines.

Ghosts in the Dating App Machine Gregory Narr, 2025-10-28 *Ghosts in the Dating App Machine* offers a critical examination of the shift to dating apps to illustrate key features of a broader shift to a mode of data colonialism based on datafication and AI orchestration. This book analyses 48 in-depth and mediated interviews, forums, blogs, and official statements made by dating apps. It situates this transition within the broader culture of data colonialism through close readings of science fiction, suggesting the world has become like *Us*, where doppelgängers constituted from reprehensible proclivities have emerged as digital profiles reflected back to users through the horrific play of social media mirrors to govern their encounters against their wishes. These mirrors allow media companies to conduct surreptitious experiments on users, dispossessed desires, devise digital doppelgängers from those they disavow, and compel

behaviors that are lucrative precisely because they are misaligned with humane values Yet this horrific play of mirrors is not inevitable By attending to the ghosts of colonialism unleashed by media companies through the approach developed in this book it is still possible to galvanize the collective will to combat data colonialism and strive to create a world where love disentangled from colonial modes of desire is possible This study will interest scholars attempting to understand the rapidly evolving ecology of dating apps within the areas of digital media media sociology cultural studies anthropology and media and communication studies
