Easy Ai Podcast Editor Tips For Teachers:

Technology and Language Learning Eric Friginal, Wing Yee Jenifer Ho, 2025-12-22 Technology and Language Learning Effective Podcasting and Video Based Language Teaching Practices in the Age of Generative AI provides English language teachers with a practical guide to integrating podcasting video based materials and Generative AI GenAI technologies into their classrooms Focused on ESL EFL and ELT the book demonstrates how these tools enhance engagement accessibility and autonomy while fostering skills like listening comprehension vocabulary development and creative language use Teachers will find strategies for using podcasts in flipped classrooms designing authentic video activities and guiding students in creating multimodal content The book highlights GenAI tools like ElevenLabs Canva and Synthesia for generating adaptive accessible materials tailored to diverse learners Addressing challenges and opportunities it emphasizes balancing AI generated content with authentic language practice Real world examples and case studies illustrate practical applications in culturally sensitive and inclusive ways Whether in traditional hybrid or online settings it offers actionable guidance for leveraging digital tools as transformative components of modern pedagogy preparing students to thrive in a GenAI driven globally connected world By bridging research and practice this textbook empowers teachers and practitioners to reimagine classrooms as dynamic spaces where technology supports creativity collaboration and critical thinking

Bringing the Neuroscience of Learning to Online Teaching Tracey Tokuhamma-Espinosa, 2021 This practical resource draws on the best of neuroscience to inform decision making about digital learning We live in unprecedented times that have pushed schools to make many decisions that have been postponed for years For the first time since the inception of public education teachers have been invited to redesign the learning landscape by integrating an intelligent selection of digital educational resources and changing pedagogical approaches based on information from the learning sciences This handbook will help teachers make the most of this opportunity by showing them how to use digital tools to differentiate learning employ alternative options to standardized testing personalize learning prioritize social emotional skills and inspire students to think more critically The author identifies some gems in quality teaching that are amplified in online contexts including 40 evidence informed pedagogies from the learning sciences This book will help all educators move online teaching and learning to new levels of confidence and success

Book Features Provides quick references to key planning tools like decision trees graphics app recommendations and step by step directions to help teachers create their own online learning courses Guides teachers through a 12 step model for instructional design that meets both national and international standards Shows educators how to use an all new Digital Resource Taxonomy to select resources and how to research and keep them up to date Explains why good instructional design and educational technology are complementary with best practices in learning sciences like Mind Brain and Education Science Shares ways teachers can leverage technology to create more time for the personalized aspects of learning Shows educators how to design online courses with tools that let all students begin at their own starting points

and how to differentiate homework Offers evidence informed pedagogies to make online intimate and authentic for students

How to Teach AI Rachelle Dené Poth, 2024 Get practical tools and strategies for teaching AI across the K 12 curriculum with this accessible guide As AI continues to transform our world educators have a responsibility to stay current with the changes and ensure that students have the necessary knowledge and skills to succeed in the future Written by an educator who is currently teaching on this topic How to Teach AI shares practical strategies and tools based on what good practice looks like in the classroom right now Readers will build confidence in integrating AI into their curriculum so they can effectively prepare students for their careers Taking a friendly and accessible approach the book covers a range of topics related to AI such as machine learning robotics and natural language processing and includes examples of how these technologies are being implemented in different industries and their impact on education The book includes a chapter dedicated to the ethics of AI addressing issues around bias intellectual property student data privacy and more The book includes Ideas for using generative AI in the classroom and tips for writing effective prompts Activity ideas across content areas including computer science economics literature music and more Time saving ideas for teachers and study aids for students to explore AI powered tool recommendations for teachers Questions for reflection in every chapter With examples from educators in the field and a variety of resources to apply in the classroom this book helps educators become comfortable with this important topic and create meaningful learning experiences for their students Audience Elementary and secondary educators and technology coaches

Building Agentic AI Sinan Ozdemir, 2025-12-08 Transform Your Business with Intelligent AI to Drive Outcomes Building reactive AI applications and chatbots is no longer enough The competitive advantage belongs to those who can build AI that can respond reason plan and execute Building Agentic AI Workflows Fine Tuning Optimization and Deployment takes you beyond basic chatbots to create fully functional autonomous agents that automate real workflows enhance human decision making and drive measurable business outcomes across high impact domains like customer support finance and research Whether you re a developer deploying your first model a data scientist exploring multi agent systems and distilled LLMs or a product manager integrating AI workflows and embedding models this practical handbook provides tried and tested blueprints for building production ready systems Harness the power of reasoning models for applications like computer use multimodal systems to work with all kinds of data and fine tuning techniques to get the most out of AI Learn to test monitor and optimize agentic systems to keep them reliable and cost effective at enterprise scale Master the complete agentic AI pipeline Design adaptive AI agents with memory tool use and collaborative reasoning capabilities Build robust RAG workflows using embeddings vector databases and LangGraph state management Implement comprehensive evaluation frameworks beyond accuracy including precision recall and latency metrics Deploy multimodal AI systems that seamlessly integrate text vision audio and code generation Optimize models for production through fine tuning quantization and speculative decoding techniques Navigate the bleeding edge of reasoning

LLMs and computer use capabilities Balance cost speed accuracy and privacy in real world deployment scenarios Create hybrid architectures that combine multiple agents for complex enterprise applications Register your book for convenient access to downloads updates and or corrections as they become available See inside book for details **Echoes Of**

Experience Arokia Lawrence Vijay,2025-04-06 Echoes of Experience Stories of Learning Language and Innovation is a celebration of creativity collaboration and transformative learning This book brings together a collection of innovative projects undertaken by students as part of the Fluency Through Practice initiative an experiential learning journey designed to enhance language proficiency and employability skills through real world applications This book showcases the outcomes of the Fluency Through Practice initiative where project based learning a globally recognized and highly effective teaching methodology was implemented to bridge the gap between theoretical knowledge and practical application By immersing students in real world scenarios this approach fosters critical thinking collaboration creativity and effective communication skills all of which are essential for their professional and personal growth This book stands as a testament to what can be achieved when learning transcends traditional boundaries and is driven by passion curiosity and hands on experience It showcases the remarkable journey of students who dared to think differently apply their knowledge creatively and embrace the challenges of real world communication Whether you are an educator student or professional Echoes of Experience Stories of Learning Language and Innovation offers insights and inspiration into how practical learning experiences can shape confident communicators and future leaders Join us in celebrating these voices of change and the stories that speak beyond words **Descript AI - AI-Assisted Podcast & Video Editing** DIZZY DAVIDSON,2025-04-19
