[Artificial Intelligence for Education](#) Mario Allegra, Manuel Gentile, Giuseppe Città, Frank Dignum, Iza Marfisi-Schottman, 2023-11-27

What learning teaching and education will be in the next future is an open question. Nevertheless, believing that an increasing prevalence of AI may not influence the education field seems objectively unlikely. In recent years, the new renaissance of AI has stimulated discussion on how advances in AI can influence the educational sector and the future educational policies and the impact of AI on Technology Enhanced Learning (TEL). On the other side, the attention of the education sector in artificial intelligence is complemented by the consideration that since the early days of AI, researchers have shown for the education sector which has often seen education as one of the preferred application areas. The interaction between the AI and TEL research fields led to the investigation of how the advance in AI could support the development of flexible, inclusive, personalized, engaging, and effective learning tools. Besides research in this area could be a powerful tool to open the learning black box by providing a deeper understanding of how learning occurs. The proposed Research Topic aims to gather contributions that provide a comprehensive picture of how AI is changing educational practices and how the key stakeholders in the educational community, i.e., students, teachers, faculty, and families, perceive this ongoing change. Relevant topics include but are not limited to: AI applications in real-world educational settings; Intelligent Tutoring Systems; Adaptive learning environments; Learning design and AI; Students profiling; definition of the student model and ethical implications; Intelligent techniques for objective and integrated students' evaluation in TEL; Teachers' competencies for effective integration of AI into Education; Teachers' perceptions of AI prejudices and attitudes; The role of cognitive architectures in Education; Serious games and AI; Social robotics in Education.

The AI and a Common Man: A Human Story in a Machine Age Sundeep V R, 2025-06-08

What if the world changed overnight and you weren't invited? Ramu, an aging electrician from the heart of Chennai, lives a simple life: tools in his bag, honesty in his hands, and a daughter he quietly dreams for. But one morning, with a cup of tea and a scroll through viral headlines, he meets something he's never faced before: Artificial Intelligence. It speaks in foreign words, moves faster than he can, and worse, it threatens everything he's ever known: his job, his role as a father, and his place in a world that's moving on without him. But Ramu doesn't run. He learns. He stumbles. He questions. And slowly, he begins to realize something profound: AI isn't the enemy. The fear is in a time flooded with hype, noise, and digital panic, *The AI and a Common Man* tells a quiet, powerful story of dignity, relevance, and the extraordinary courage of ordinary people. It's not just a book about technology; it's a book about belonging. About fatherhood. About being human in a machine age. If you've ever asked, "Will I still matter? Can I keep up with this future?" What does AI really mean for someone like me? This story will speak to you. Raw, relatable, and ultimately hopeful, this is the
