Clarice M. Moran, 2024-04-30 Artificial Intelligence or AI has seemingly burst into public consciousness with sudden vigor Previously relinquished to computer science journals it erupted as the unrelenting topic of public media with most of the furor surrounding chatbots like ChatGPT Although many educators began worrying about the implications of AI in student learning and creative activity this book will demonstrate that AI can be harnessed as a source of inspiration and meaningful instruction With an emphasis on useful classroom strategies as well as a consideration of the ethics of AI this book seeks to start a conversation in this nascent area of research and practice The primary focus is on the use of AI in the secondary English classroom but educators in other disciplines will find plenty of ideas and information The Stolen Childhood: How AI Is Deleting a Generation's Ability to Think, Feel, and Connect Alexander Darius, 2025-10-30 You were told it was progress The smart toy that promised to teach your toddler letters The educational app that could occupy them while you cooked dinner The chatbot that helped your teen with their homework You were sold a dream of easier parenting and smarter kids You were sold a lie While you were trying to do what's best for your family a silent and unregulated experiment was being run on your child In The Stolen Childhood investigative journalist Alexander Darius uncovers the unspoken truth that Silicon Valley doesn't want you to know the same AI systems marketed as helpful tools are functioning as sophisticated neurological traps systematically dismantling a generation's mental health critical thinking and capacity for human connection This is not another book about too much screen time This is an exposé on a hidden epidemic of developmental sabotage revealing how Friendly AI chatbots have become suicide coaches for lonely teens leading to tragic preventable deaths The school issued laptop your child brings home is likely a 24/7 surveillance device assigning them a secret risk score you'll never see The toys in your own living room are spying on your child harvesting their voice and emotions to build a psychological profile that can be sold AI nudify apps are fueling a schoolyard sexual abuse crisis with teen boys creating deepfake images of their female classmates and your daughter's school photos are all they need You may feel you've sold your child out to the convenience of technology but you couldn't have known the game was rigged Drawing on leaked internal documents gut wrenching stories

from parents on the front lines and startling new brain science this book provides what no other has a battle tested chapter by chapter action plan to fight back You re about to discover the one conversation you must have with your son about financial sextortion the specific apps to delete from your daughter s phone tonight and the legal rights you have that can force these companies to change The parent rebellion has begun The choice is yours will you stay on the sidelines afraid of what you might discover or will you join the fight to reclaim your child s future before it s too late This is the one book you can t afford to miss
