Conversational Artificial Intelligence Romil Rawat, Rajesh Kumar Chakrawarti, Sanjaya Kumar Sarangi, Anand Rajavat, Mary Sowjanya Alamanda, Kotagiri Srividya, K. Sakthidasan Sankaran, 2024-01-30 This book reviews present state of the art research related to the security of cloud computing including developments in conversational AI applications It is particularly suited for those that bridge the academic world and industry allowing readers to understand the security concerns in advanced security solutions for conversational AI in the cloud platform domain by reviewing present and evolving security solutions their limitations and future research directions Conversational AI combines natural language processing NLP with traditional software like chatbots voice assistants or an interactive voice recognition system to help customers through either a spoken or typed interface Conversational chatbots that respond to questions promptly and accurately to help customers are a fascinating development since they make the customer service industry somewhat self sufficient A well automated chatbot can decimate staffing needs but creating one is a time consuming process Voice recognition technologies are becoming more critical as AI assistants like Alexa become more popular Chatbots in the corporate world have advanced technical

connections with clients thanks to improvements in artificial intelligence However these chatbots increased access to sensitive information has raised serious security concerns Threats are one time events such as malware and DDOS Distributed Denial of Service assaults Targeted strikes on companies are familiar and frequently lock workers out User privacy violations are becoming more common emphasizing the dangers of employing chatbots Vulnerabilities are systemic problems that enable thieves to break in Vulnerabilities allow threats to enter the system hence they are inextricably linked Malicious chatbots are widely used to spam and advertise in chat rooms by imitating human behavior and discussions or to trick individuals into disclosing personal information like bank account details

Breaking Barriers with Generative Intelligence. Using GI to Improve Human Education and Well-Being Azza Basiouni, Claude Frasson, 2024-07-25 The book constitutes the proceedings for the First International Conference on Breaking Barriers with Generative Intelligence BBGI 2024 held in Thessaloniki Greece on June 10 2024 This Workshop is part of the 20th International Conference on Intelligent Tutoring Systems ITS2024 which was held in Thessaloniki from June 10 to June 13 2024 The 19 full papers and 1 short paper included in this volume were carefully reviewed and selected from a total of 24 submissions Breaking Barriers with Generative Intelligence delves into how GI in AI improves human education and well being This interdisciplinary event brought together professionals from academia industry and government to address AI ethics human AI interaction and the societal implications of GI Participants learned to tackle social concerns and promote diversity in research and development through keynote presentations panel discussions and interactive workshops

Technology-mediated Learning During the Pandemic Jitendra Singh, Vikas Kumar, 2024-06-21 This volume discusses the emergence of information and communication technology ICT based teaching and learning during the Covid 19 pandemic as a potential alternative to traditional classroom based learning It presents a collection of theories practices and case studies from across the globe and covers different aspects of education from a multidisciplinary perspective While focusing on the various opportunities that surfaced while carrying out innovative experiments in the online learning space the book discusses pedagogical challenges and the need for a shift in teaching pedagogy towards online learning It outlines the existing learning theories reasons behind their failure and new theories that emerged to fill the need for new methods for delivery of content and pedagogy The book discusses the issues faced by stakeholders including institute administrators students and teachers to prepare for this new method of teaching and learning It highlights the role of virtual laboratories in supplementing the needs of students in the remote learning environment The book also discusses the role and impact of social media as a powerful tool of learning and educational communication This book will be of interest to teachers students and researchers of education higher education digital education information technology educational psychology and media studies It will also be useful for courses on e learning educationalists policymakers educational institutions online education centres and practitioners working in the related areas
