Futureproofing Engineering Education for Global Responsibility Michael E. Auer, Tiia Rüttnann, 2025-03-22 This book contains papers in the fields of Collaborative learning Digital transition in education AI and learning analytics in engineering education Diversity in engineering education The authors are currently witnessing a significant transformation in the development of education on all levels and especially in post secondary and higher education To face these challenges higher education must find innovative and effective ways to respond in a proper way

Changes have been made in the way we teach and learn including the massive use of new means of communication such as videoconferencing and other technological tools. Moreover, the current explosion of artificial intelligence tools is challenging teaching practices maintained for centuries. Scientifically based statements as well as excellent best practice examples are necessary for effective teaching and learning engineering. The 27th International Conference on Interactive Collaborative Learning ICL2024 and 53rd Conference of International Society for Engineering Pedagogy IGIP which took place in Tallinn, Estonia, between 24 and 27 September 2024, was the perfect place where current trends in higher education were presented and discussed. IGIP conferences have been held since 1972 on research results and best practices in teaching and learning from the point of view of engineering pedagogy science. ICL conferences have been held since 1998, being devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in learning and Engineering Pedagogy. In this way, the authors try to bridge the gap between pure scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education, lecturers, etc.

Transforming Management Using Artificial Intelligence Techniques Vikas Garg, Rashmi Agrawal, 2020-11-09. This book redefines management practices using artificial intelligence (AI) by providing a new approach. It offers a detailed, well-illustrated treatment of each topic with examples and case studies and brings the exciting field to life by presenting a substantial and robust introduction to AI in a clear and concise manner. It provides a deeper understanding of how the relevant aspects of AI impact each other's efficacy for better output. It is a reliable and accessible one-step resource that introduces AI, presents a full examination of applications, provides an understanding of the foundations, examines education powered by AI, entertainment, home and service robots, healthcare, reimagined predictive policing, space exploration, and so much more, all within the realm of AI. This book will feature uncovering new and innovative features of AI and how it can help in raising economic efficiency at both micro and macro levels. Both the literature and practical aspects of AI and its uses are summarized. This book summarizes key concepts at the end of each chapter to assist reader comprehension. Case studies of tried and tested approaches to resolutions of typical problems are included. Ideal for both teaching and general knowledge purposes, this book will also simply provide the topic of AI for the readers, aspiring researchers, and practitioners involved in management and computer science so they can obtain a high level of understanding of AI and managerial applications.
